

**National Interagency Coordination Center
Incident Management Situation Report
Tuesday, June 23, 2009 – 0530 MDT
National Preparedness Level 1**

National Fire Activity

Initial attack activity: Light (99 new fires)
 New large fires: 4 (*)
 Large fires contained: 3
 Uncontained large fires: 5
 Area Command Teams committed: 0
 NIMOs committed: 0
 Type 1 IMTs committed: 0
 Type 2 IMTs committed: 0

** Uncontained large fires do not include confine/contain incidents. **

Alaska Area (PL 2)

New fires: 8
 New large fires: 0
 Uncontained large fires: 4

Bear Creek, Tanana Zone, BLM. Thirty-three miles east of Lake Minchumina, AK. Black spruce, hardwood slash and brush. No new information.

Winter Trail, Southwest Area, Alaska DOF. Ten miles west of Aniak, AK. Spruce and tundra. Smoldering and creeping. Reduction in acreage due to more accurate mapping.

Slate Creek, Tanana Zone, BLM. Thirty-eight miles northwest of Fairbanks, AK. Black spruce and mixed hardwoods. Smoldering.

Blind River, Tanana Zone, BLM. Seventeen miles southwest of Tanana, AK. Spruce and brush. Smoldering.

FLS – Florida DOF

Predictive Services Discussion: In Alaska, scattered wet thunderstorms are expected over the central and northern interior today with cool, showery weather in the south. The Southwest will see scattered mostly wet thunderstorms except for dry weather in western Arizona. Elsewhere, most of the West will be dry and warmer except for widely scattered wet thunderstorms in the Great Basin and central Rockies.

Refusing Risk ("Turndown" Protocol)

Every firefighter has the right and obligation to report safety problems and contribute ideas regarding their safety. Supervisors are expected to give these concerns and ideas serious consideration. When an individual feels an assignment is unsafe, they also have the obligation to identify, to the degree possible, safe alternatives for completing that assignment. Turning down an assignment is one possible outcome of managing risk.

- A turndown is a situation where an individual has determined an assignment cannot be undertaken as given, and they are unable to negotiate an alternative solution.
- A turndown must be based on an assessment of risks and the ability of an individual or organization to control those risks.
- A situation may be a candidate for a turndown if:
 - There is a violation of safe work practices.
 - Environmental conditions make the work unsafe.
 - The forces lack the necessary qualifications or experience.
 - Defective equipment is being used.
- The following steps will be used when turning down an assignment:
 - The individual will directly inform their supervisor that they are turning down the assignment as given. (Document using criteria outlined in the risk management process.)
 - Supervisor will notify the Safety Officer immediately upon being informed. In the absence of a Safety Officer, the appropriate Section Chief or Incident Commander will be notified. This step provides accountability for decisions and initiates communication of safety concerns.
 - If the supervisor requests another resource to perform the assignment, he/she is responsible for informing that resource that the assignment has previously been refused and the reason(s) why.
 - The safety hazard should be documented by the submission of a SAFENET or SAFECOM.
- These actions do not stop an operation from being carried out. This protocol is integral to the effective management of risk as it provides timely identification of hazards to the chain of command, raises risk awareness for both leaders and subordinates, and promotes accountability.
