

**National Interagency Coordination Center
Incident Management Situation Report
Wednesday, July 1, 2009 – 0530 MDT
National Preparedness Level 1**

National Fire Activity

Initial attack activity: Light (154 new fires)
 New large fires: 1 (*)
 Large fires contained: 0
 Uncontained large fires: 4
 Area Command Teams committed: 0
 NIMOs committed: 0
 Type 1 IMTs committed: 0
 Type 2 IMTs committed: 0

** Uncontained large fires do not include confine/contain incidents. **

Predictive Services Discussion: Hot and dry weather persists over the West today. Widely scattered thunderstorms, some of them dry, are expected over portions of California, southern Oregon, Idaho and Montana. More numerous and wetter storms will be found over the Great Basin and Southwest Areas. A warming and drying trend continues in the interior of Alaska along with a few thunderstorms.

Aviation "Watch Out" Situations

As part of risk management, especially during high activity fires, each aviation manager and employee should be asking questions.

- Is the flight necessary?
- Who is in charge?
- Are all hazards identified and have you made them known?
- Should the operation or the flight be stopped due to a change in conditions? Consider the following:
 - Communications
 - Confusion
 - Personnel
 - Weather
 - Turbulence
 - Conflicting priorities

- Is there a better way to do it?
- Are you driven by the task and sense of urgency?
- Can you justify your actions?
- Are there other aircraft in the area?
- Will the pilot accept the mission?
- Are any guidelines being ignored or policies being broken?
- Are communications getting tense?
- Are you deviating from the assigned operation or flight?
