

**National Interagency Coordination Center
Incident Management Situation Report
Friday, July 24, 2009 – 0530 MDT
National Preparedness Level 2**

National Fire Activity

Initial attack activity: Light (180 new fires)
 New large fires: 2 (*)
 Large fires contained: 3
 Uncontained large fires** : 9
 Area Command Teams committed: 0
 NIMOs committed: 0
 Type 1 IMTs committed: 0
 Type 2 IMTs committed: 3

Nationally, there are 59 large fires being managed with minimal or no resource commitment that are not shown on today's report.

** Uncontained large fires do not include confine/contain and resource benefit incidents. **

INF – Inyo NF

Predictive Services Discussion: Scattered thunderstorms, some of them dry, are expected today from the Washington Cascade eastward into Idaho, Montana and Wyoming. Thunderstorms are also on tap for the Southern Sierras and Great Basin. Otherwise, hot weather will continue across the West. The Alaska interior should once again see gusty winds north of the Alaska Range along with widely scattered thunderstorms.

Chainsaw Safety

Chainsaw safety is every saw operator's job.

- Always wear proper P.P.E. when handling or working around chainsaws.
 - Eye protection- approved goggles or safety glasses (no sunglasses)
 - Chainsaw Chaps- proper size and length
 - Gloves-proper size
 - Long sleeve shirt-no loose sleeves
 - Leather boots-no loose boot laces

- Take the time to inspect the chainsaw before operating the saw.
 - Check the chain and bar- Sharpness of chain, Bar seated correctly
 - Check the bolts and screws all around the saw- no missing screws or bolts
 - Check the casing of the saw- no cracked or missing plastic

- Make sure you're aware of your surroundings while operating the chainsaw.
 - Look for people working in your area- advise all personnel you're operating the saw.
 - Look for any snags or hazards in your area- look up for power lines, widow makers, etc.
 - Make sure you always have a spotter or swamper to use for communications.
 - Always watch your footing while operating the saw- loose, rocky, steep terrain can cause you to slip while the chainsaw is running.

- Always make sure you are comfortable doing the task at hand.
 - Proper training for personnel running saws.
 - While falling trees know your escape route.
 - If you are not comfortable falling the tree walk away. Notify your supervisor and mitigate the safety issues or turn down the assignment.
