

**National Interagency Coordination Center
Incident Management Situation Report
Friday, March 19, 2010 – 0800 MT
National Preparedness Level 1**

National Fire Activity (Weekly Total)

Initial attack activity: Light (478 new fires)
 New large fires: 4 (*)
 Large fires contained: 5
 Uncontained large fires : ** 1
 Area Command Teams committed: 0
 NIMOs committed: 0
 Type 1 IMTs committed: 0
 Type 2 IMTs committed: 0

Nationally, there are 0 large fires being managed with minimal or no resource commitment.

** Uncontained large fires do not include confine/contain and resource benefit incidents.

N5S - Capitan District, New Mexico State Forestry

Predictive Services Discussion: A storm system that stretches from the Southwest to the Great Lakes today, will move east and reach the East Coast on Sunday and Monday. The main fire weather concerns over the next few days are 1) windy and low RH conditions in southeast New Mexico and west Texas today, 2) low humidity over Florida today, Saturday and Monday and 3) dry, windy weather in southwest Missouri today.

[Link](#) to Predictive Services Outlook products.

Today's discussion is from the
Aviation Category.

Scenarios are situations that can arise on a Wildland Fire or Aviation incident and are meant to add a realistic setting for the application of Today's Safety Discussion.

WORKING WITH HELICOPTER DROPS

Consider the following questions when you have a helicopter with a bucket working in your area:

If the helicopter is a Type 1 increase the distance of standby place from the drop zone.
Use helicopter drops to knock down or secure a fire area that poses a direct imminent threat to escaping control lines or climbing up ladder fuels.

- Do you have good communications?
- Does the pilot have a clear understanding of the target?
- Are trees and snags in the drop zone?
- Are ground crews clear of the area?
- What are the winds doing?
- What is the turnaround time for the helicopter?
- Are people on the ground aware of the effects of the helicopter's rotorwash?
- Give feedback to the pilot about drop accuracy. Be honest and constructive.
- Be aware that helicopter performance capabilities may be significantly reduced at high altitudes and/or high temperatures.
