

**National Interagency Coordination Center
Incident Management Situation Report
Sunday, June 6, 2010 – 0530 MT
National Preparedness Level 2**

National Fire Activity

Initial attack activity:	Light (45 new fires)
New large fires:	1 (*)
Large fires contained:	2
Uncontained large fires: **	10
Area Command Teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	1
Type 2 IMTs committed:	3

Nationally, there are 30 large fires being managed to achieve multiple objectives.

** Uncontained large fires includes only fires being managed under a full suppression strategy.**

[Link](#) to Geographic Area daily reports.

Department of Interior personnel are assigned to several locations in the Gulf of Mexico to assess and mitigate impacts resulting from the Deepwater Horizon oil spill.

- A total of 358 Fish and Wildlife Service personnel are assigned to Delta, Breton and Bon Secour National Wildlife Refuges, as well as Houma, LA and Mobile, AL.

- A total of 305 National Park Service personnel are assigned to Gulf Islands National Seashore, Jean Lafitte Park and Preserve, Everglades National Park, Dry Tortugas, Biscayne National Park, De Soto National Memorial and Big Cypress National Preserve.

Alaska Area (PL 4)

New fires:	10
New large fires:	1
Uncontained large fires:	6
Type 2 IMTs committed:	2

Eagle Trail, Tok Area Forestry, Alaska DOF. IMT 2 (Allen). One mile south of Tanacross, AK. Spruce. Creeping and smoldering with isolated torching. Traffic delays along the Alaska Highway.

Gilles Creek, Delta Area Forestry, Alaska DOF. IMT2 (Paul). Twenty miles north of Delta, AK. Black spruce, brush and grass. Smoldering. Numerous structures threatened.

Turquoise Lake, Southwest Area Forestry, Alaska DOF. Previously reported confine/contain incident. Fifteen miles southwest of Farewell, AK. Black spruce. Backing fire with isolated torching. Residences and outbuildings threatened. Last report unless significant activity occurs.

Applegate, Tanana Zone, BLM. Started on state land 25 miles northeast of Manley Hot Springs, AK. Black spruce, brush and grass. Creeping and smoldering. Numerous structures threatened.

Toklat 2, Tanana Zone, BLM. Started on state land 25 miles southwest of Nenana, AK. Black spruce and tundra. Smoldering and creeping. Precipitation occurred over the fire area yesterday. Numerous structures threatened.

Eklutna, Mat-Su Area, Alaska DOF. Thirty-seven miles northeast of Anchorage, AK. Timber and grass. Creeping and smoldering.

* **Waterfall**, Upper Yukon District, BLM. Confine/contain incident. Thirty miles northwest of Eagle, AK. Timber. No further information received. Last report unless significant activity occurs.

Christian River, Upper Yukon Zone, BLM. Fifty-six miles north of Fort Yukon, AK. Timber litter. Extreme fire behavior with running, torching and spotting.

Predictive Services Discussion: Increased fire potential today over the Southwest due to very hot and dry weather along with a few thunderstorms over the mountains of New Mexico. Southern California will also be hot and dry. In Alaska scattered showers and a few thunderstorms are expected over mainly the southern Interior, with cooler temperatures and higher humidity. Warmer and drier weather in the northern Alaska Interior.

[Link to Predictive Services Outlook products.](#)

Today's discussion is from the
Fireline Safety Category.

FIRE NOT SCOUTED AND SIZED UP

Watchout Situation #1 comes up during initial attack and **every time** resources arrive at a fire.

- Before taking action on the fire, the following considerations must be addressed:
 - Can you personally observe the fire or must you use scouts? Describe ways you can scout and size up a fire.
 - Do you know the location of the fire perimeter? Discuss situations in which the fire perimeter may not be obvious. (Spotty fires, etc.)
 - Do you know the direction of fire spread? When isn't the direction of fire spread obvious? (Wind shifts, spotty fires, etc.)
 - Does the direction of fire spread increase risk? Talk about situations where you may have to approach the head of the fire. (Hiking down from a helispot, approaching from an existing road, switching winds, etc.)
 - Do you know the fuels and their condition? What kind of information will you assume from what you already know about fuel types? (Spot fires in fir, extreme fire potential in flashy fuels, etc.)
 - Are there aerial resources that can act as lookouts?

● Continued...

- Do topographic hazards exist? What can you assume from what kind of terrain the fire covers? (Slope, chimneys, aspect, etc.)
- Does enough information exist to establish a plan of attack? When do you have enough information to begin fighting fire? What do you need to know?
- Do other dangers exist? Have you talked about factors specific to the area you are working in? (Hunters in the woods, drought, snag patches, etc.)

● To reduce the risks:

- Post lookouts until the fire is sized up and escape routes and safety zones are established.
- Retreat if the situation is too complex. Review fires where you had to wait until the area in which you were assigned to work was scouted and sized up before you were allowed onto the fireline.
