

**National Interagency Coordination Center
Incident Management Situation Report
Wednesday, June 30, 2010 – 0530 MT
National Preparedness Level 2**

National Fire Activity

Initial attack activity:	Light (134 new fires)
New large fires:	3 (*)
Large fires contained:	2
Uncontained large fires: **	10
Area Command Teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	1
Type 2 IMTs committed:	2

Nationally, there are 43 large fires being managed to achieve multiple objectives.

** Uncontained large fires include only fires being managed under a full suppression strategy. **

[Link](#) to Geographic Area daily reports.

Department of Interior personnel are assigned to several locations in the Gulf of Mexico to assess and mitigate impacts resulting from the Deepwater Horizon oil spill.

- A total of 499 personnel are assigned to the Fish and Wildlife Service at Delta, Breton and Bon Secour National Wildlife Refuges, as well as Houma, LA and Mobile, AL.

- A total of 88 National Park Service personnel are assigned to Gulf Islands National Seashore, Jean Lafitte Park and Preserve, Everglades National Park, Dry Tortugas, Biscayne National Park, De Soto National Memorial and Big Cypress National Preserve.

Southwest Area (PL 4)

New fires:	17
New large fires:	0
Uncontained large fires:	4
Type 1 IMTs committed:	1

Schultz, Coconino NF. Transfer of command from IMT1 (Hughes) back to local unit will occur 7/1. Four miles north of Flagstaff, AZ. Timber. Smoldering.

Paradise, Apache-Sitgreaves NF. Limited perimeter control incident. Sixteen miles southeast of Alpine, AZ. Timber. No new information. Last report unless significant activity occurs.

South Fork, Santa Fe NF. Twenty miles west of Espanola, NM. Timber. Minimal fire activity.

Horseshoe, Coronado NF. Five miles south of Portal, AZ. Timber. Minimal fire activity. Significant precipitation occurred over the fire area yesterday.

Tecolote, Santa Fe NF. Fifteen miles northwest of Las Vegas, NM. Timber. Minimal fire activity.

Predictive Services Discussion: Thunderstorms will develop across much of the intermountain West today with driest storms over Arizona, the Eastern Great Basin, western Colorado and Wyoming. Gusty winds will develop across the southern Great Basin today. Hot temperatures will move into the Northern Rockies and Rocky Mountain Areas, with cooler temperatures across California with onshore flow. Alaska will continue to see warm and dry conditions across the interior with increasing chances for thunderstorms.

[Link](#) to Predictive Services Outlook products.

Today's discussion is from the
Fireline Safety Category.

UNINFORMED ON STRATEGY, TACTICS OR HAZARDS

Firefighters who are uninformed on strategy, tactics or hazards are in conflict with Watchout Situation #5. Before going to the fireline, it is imperative that firefighters obtain information about strategies, tactics or hazards by asking themselves the following questions:

- Can communications be established to find out strategy, tactics or hazards? Discuss ways you might establish communications; for example, contacting someone who is already on the fire and asking them what tactics and strategies are working or not working, what hazards they have witnessed, etc.
- Can scouting safely identify potential hazards? Talk about different methods of scouting a fire (e.g., using a lookout from your crew or sending a line scout ahead, utilizing air attack or the spotter on a smokejumper airplane). Discuss what types of hazards you might come across and ways you would mitigate them. For example, arriving at a fire after dark and a being instructed to dig line downhill with the fire below. How could you make this a safe situation?
- Have strategies, tactics or hazards changed since last informed? Discuss situations that might alter the way you are fighting a fire (e.g., wind shifts, resources you expected don't arrive, etc.). Also, think about what new hazards can develop while you are on the fireline (e.g., roots burning out and trees coming down, winds shifting direction and speed, etc.)
- Can you get a briefing from your supervisor? Talk about the importance of constant communications and ensuring firefighters are on the same page with strategies and tactics. For example, if one crew decides to do a burnout, but doesn't let the crew at the other end of the line know what they are doing, then what can happen?
- To reduce the risks:
 - Post lookouts.
 - Determine escape routes and establish safety zones.
 - Consider retreating until you are informed.
 - Don't leave a staging area or operational briefing until you have all the pertinent information. Emphasize ways to inform firefighters about strategies, tactics and hazards. Tell a story about when you were uninformed and what you did to correct the situation so that you were safe.
 - Get the national standard Incident Response Pocket Guide standard briefing
