

**National Interagency Coordination Center
Incident Management Situation Report
Saturday, September 18, 2010 – 0530 MT
National Preparedness Level 2**

National Fire Activity

Initial attack activity: Light (169 new fires)
 New large fires: 1 (*)
 Large fires contained: 1
 Uncontained large fires: ** 3
 Area Command Teams committed: 0
 NIMOs committed: 0
 Type 1 IMTs committed: 0
 Type 2 IMTs committed: 2

Nationally, there are 79 large fires being managed to achieve multiple objectives.

** Uncontained large fires include only fires being managed under a full suppression strategy.

Predictive Services Discussion: Significant fire potential is forecast today for portions of Utah, Colorado and Wyoming. A low pressure trough off the coast and a high pressure ridge over the Rockies will produce dry, gusty winds from the Sierras to the Rockies. Most of the West will be warm and dry except for showers over the Pacific Northwest, northern Idaho and Montana.

[Link](#) to Predictive Services Outlook products.

Today's discussion is from the Weather / Fire Behavior Category.

BASE ALL ACTIONS ON CURRENT AND EXPECTED FIRE BEHAVIOR

- Can the resources you are replacing give you a thorough briefing? What information will you want to get from resources you are replacing?
- Can you observe the area or use scouts? What information are the scouts looking for?
- Have escape routes and safety zones been thoroughly scouted? List some ways your crew will scout out an area before you begin working
- Are escape routes and safety zones marked for night use? How do you adjust marking safety zones and escape routes for night use?
- Have potential dangers been located and can they be dealt with? List some dangerous fire behavior you may encounter and how you would deal with it.
- Do you have access to weather and fire behavior forecasts? What is your unit's procedure for obtaining forecasts?
- To reduce risk, initiate the following:
 - Post lookouts.
 - Check communications.
 - Retreat if you have doubts about your escape routes or safety zones or if the situation becomes too complex. Discuss fires where you have adjusted your actions based on current and expected fire behavior.

How would you judge the fire season? (Above normal, below, or average.)
