

**National Interagency Coordination Center
Incident Management Situation Report
Monday, September 27, 2010 – 0530 MT
National Preparedness Level 2**

National Fire Activity

Initial attack activity: Light (70 new fires)
 New large fires: 2 (*)
 Large fires contained: 2
 Uncontained large fires: ** 2
 Area Command Teams committed: 0
 NIMOs committed: 0
 Type 1 IMTs committed: 0
 Type 2 IMTs committed: 1

Nationally, there are 80 large fires being managed to achieve multiple objectives.

** Uncontained large fires include only fires being managed under a full suppression strategy.

Eastern Great Basin Area (PL 3)

New fires: 4
 New large fires: 0
 Uncontained large fires: 0
 Type 2 IMTs committed: 1

Twitchell Canyon, Fishlake NF. IMT 2 (Whalen). Seven miles east of Manderfield, UT. Timber. Active fire behavior with short duration crown runs and mid-range spotting. Structures, a portion of Interstate 70 and a major power corridor threatened.

Southern Area (PL 1)

New fires: 3
 New large fires: 2
 Uncontained large fires: 2

Big Hollow, George Washington and Jefferson NF. Two miles south of Millboro Springs, VA. Hardwood litter. Interior smoldering. Residences threatened. Precipitation occurred over the fire area yesterday. Last report unless significant activity occurs.

Phillips, George Washington and Jefferson NF. Four miles north of Craigs ville, VA . Timber. Backing and creeping fire. Precipitation occurred over the fire area yesterday. Last report unless significant activity occurs.

* **Catalytic Converter**, North Carolina DOF. Two miles south of Rich Square, NC. Hardwood litter and brush. Active fire behavior with running, crowning and mid-range spotting. Numerous structures threatened.

* **Purvis Farm**, North Carolina DOF. Six miles south of Scotland Neck, NC. Timber and chaparral. Running fire with group torching and intermittent crown runs. Structures threatened.

UIX - Uinta County

Predictive Services Discussion: Very warm and dry weather continues over most of the West today. Southern California will be hot with very low humidity and locally gusty winds in canyons and passes. Scattered showers and thundershowers are expected east of the Mississippi River.

[Link](#) to Predictive Services Outlook products.

**Today's discussion is from the
Fireline Safety Category.**

ON A HILLSIDE WHERE ROLLING MATERIAL CAN IGNITE FUEL BELOW

When firefighters find themselves in Watchout Situation #13, they must answer the following questions:

- Can you locate/construct a line to prevent material from rolling below? What do you call line that catches rolling material? Describe how you would construct this type of line and what factors you would have to consider (e.g., slope, fuels, etc.)
- Will you get enough warning of rolling material to prevent being hit by it? Who needs to be watching for rolling material? What kinds of warning systems could you establish?
- Can you see where any material that rolls below you goes and what it does? What can happen when material rolls out of the fire and below you out of view? What needs to be done to mitigate this danger?
- Is the area free of large amounts of flashy fuels? Review the Common Denominators of Tragedy Fires.
- Is the area free of chimneys, gullies, and steep slopes? Review the Common Denominators of Tragedy Fires.
- Do you have two escape routes so you can go either way? Talk about where your most likely escape routes and safety zones will be when you are on a hillside where rolling material can ignite fuel below.
- To reduce the risks:
 - Post lookouts.
 - Consider locating line in a defensible position. Talk about steep fires where you have had material rolling out below you and how you dealt with it.
