

**National Interagency Coordination Center
Incident Management Situation Report
Wednesday, August 24, 2011 – 0530 MT
National Preparedness Level 2**

National Fire Activity

Initial attack activity:	Light (189 new fires)
New large fires:	13 (*)
Large fires contained:	6
Uncontained large fires: **	26
Area Command Teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	0
Type 2 IMTs committed:	6

Nationally, there are 45 large fires being managed to achieve multiple objectives.

** Uncontained large fires include only fires being managed under a full suppression strategy.

Northern Rockies Area (PL 3)

New fires:	14
New large fires:	5
Uncontained large fires:	9
Type 2 IMTs committed:	4

* **West Riverside**, Montana DNR. IMT 2 (Grant). Twelve miles southeast of Missoula, MT. Timber. Active fire behavior. Structures threatened.

Water Hole, Northern Cheyenne Agency, BIA. IMT 2 (Benes) IMT is also managing the Boss Ribs incident. Six miles northwest of Lame Deer, MT. Grass. No new information.

Boss Ribs, Northern Cheyenne Agency, BIA. Nine miles south of Lame Deer, MT. Timber. No new information.

Maverick, Miles City Field Office, BLM. IMT 2 (Heintz). IMT is also managing the Little and Fork incidents. Twenty-one miles southwest of Broadus, MT. Timber and Brush. Running, torching, and creeping. Structures threatened.

Little, Miles City Field Office, BLM. Thirty-two miles southeast of Ashland, MT. Timber and brush. Running, torching, and creeping. Structures threatened.

Fork, Miles City Field Office, BLM. Twenty-nine miles south of Ashland, MT. Timber and brush. Running, torching, and creeping. Structures threatened.

* **Mill**, Custer NF. Fifteen miles northeast of Ashland, MT. Timber and brush. Active fire behavior.

Beauvais Creek, Crow Agency, BIA. Twenty-five miles west of Crow Agency, MT. Brush and grass. No new information. Last report unless new information is received.

* **Cow Creek 3**, Montana DNR. Started on private lands eleven miles north of Joliet, MT. Timber. Active fire behavior. Structures threatened.

* **Saddle Complex – Bitterroot Branch**, Bitterroot NF. IMT 2 (Hutton). Thirty miles southwest of Darby, MT. Timber. Active fire behavior. Structures threatened.

* **East Fork**, Nez Perce NF. Forty miles southwest of Elk City, ID. Timber. Active fire behavior.

Predictive Services Discussion: Isolated coastal showers are expected over the Pacific Northwest near a front. Scattered thunderstorms will develop over the Southwest and Rocky Mountains. Showers and thunderstorms will also develop ahead of a front from the Great Lakes region to Oklahoma. Scattered showers and thunderstorms are expected along the Gulf Coast and coastal parts of the Southern Atlantic Coast States. Very warm to hot conditions will continue across Texas and much of the West.

Predictive Services Outlook products: <http://www.predictiveservices.nifc.gov/outlooks/outlooks.htm>

**Today's discussion is from the
Fireline Safety Category.**

DOWNHILL FIRELINE CONSTRUCTION CHECKLIST

Downhill fireline construction is hazardous in steep terrain, fast-burning fuels, or rapidly changing weather. Downhill fireline construction should not be attempted unless there is no tactical alternative. When building downhill fireline, the following is required:

- Crew supervisor(s) and fireline overhead will discuss assignments prior to committing crew(s). Responsible overhead individual (TFLD or ICT4 qualified or better) will stay with resources until the job is completed.
- Decision will be made after proposed fireline has been scouted by supervisor(s) of involved crew(s).
- LCES will be coordinated for all personnel involved.
 - Crew supervisor(s) is in direct contact with lookout who can see the fire.
 - Communication is established between all crews.
 - Ensure rapid access to safety zone(s) in case fire crosses below crew(s).
- Direct attack will be used whenever possible; if not possible, the fireline should be completed between anchor points before being fired out.
- Fireline will not lie in or adjacent to a chute or chimney.
- Starting point will be anchored for crew(s) building fireline down from the top.
- Bottom of the fire will be monitored; if the potential exists for the fire to spread, action will be taken to secure the fire edge.
- Can fire be carried with you?
