

**National Interagency Coordination Center
Incident Management Situation Report
Friday, June 8, 2012 – 0530 MT
National Preparedness Level 2**

National Fire Activity

Initial attack activity: Light (84 new fires)
 New large fires: 2 (*)
 Large fires contained: 3
 Uncontained large fires: ** 16
 Area Command Teams committed: 0
 NIMOs committed: 0
 Type 1 IMTs committed: 1
 Type 2 IMTs committed: 4

** Uncontained large fires include only fires being managed under a full suppression strategy.

Southwest Area (PL 3)

New fires: 18
 New large fires: 0
 Uncontained large fires: 5
 Type 1 IMTs committed: 1

Whitewater-Baldy, Gila NF. IMT 1 (Sciacca). Fifteen miles east of Glenwood, NM. Timber. Active fire behavior with long-range spotting. Structures threatened.

Gladiator, Prescott NF. Started on state land one mile east of Crown King, AZ. Timber. Smoldering. Road closures in effect.

Montezuma, Papago Agency, BIA. Twenty miles southeast of Sells, AZ. Timber and grass. Creeping and smoldering. Structures threatened.

Bear Springs, Santa Fe NF. Five miles east of Ponderosa, NM. Brush and hardwood slash. No further information received.

Colorado Peak, Santa Fe NF. Ten miles northwest of Santa Fe, NM. Brush and hardwood slash. Minimal fire activity.

Predictive Services Discussion: A late spring trough will move into the western U.S., driving a cold front across the Northwest and into the Great Basin. Critical fire weather conditions associated with high winds and low relative humidity will develop across much of the Great Basin and the Southwest. Scattered rain with snow at higher elevations will move through the Northwest and the northern Rockies. Surface high pressure across the eastern U.S. will keep mild to warm conditions over most of the region. Gusty winds will develop over the Plains, and scattered showers and thunderstorms will continue over the Gulf Coast states. A cold front dipping into the Great Lakes region will bring scattered rain and thunderstorms to the upper Mississippi Valley. In Alaska, warm weather will continue with scattered thunderstorms developing in the Interior and showers continuing over the south coast.

<http://www.predictiveservices.nifc.gov/outlooks/outlooks.htm>

Today's discussion is from the
First Aid / Health Category.

HYPOTHERMIA

Hypothermia occurs when your core body temperature falls below normal. It can easily happen in cold winds or wetness. Hypothermia can also occur in moderately cool temperatures, particularly if coupled with dehydration. People tend to forget to drink on cool, wet days and can get hypothermic even when the temperature stays well above freezing.

- - Symptoms of hypothermia include Slurred speech
 - Weakness and loss of coordination
 - Confusion
 - Irrational behavior

 - Uncontrollable shivering (although, at extremely low body temperatures, shivering may stop)
 - Pale and cold skin
 - Drowsiness – especially in more severe stages
 - Slowed breathing or heart rate

- Your body automatically begins to shiver to warm itself. As your energy is used up to keep warm, you may reach a point where your body will be unable to warm itself. If left untreated, your body will gradually shut down; and you can die.

- You can avoid hypothermia with the following precautions:
 - Guard against dehydration.
 - Avoid fatigue.
 - Avoid cold winds.
 - Take precautions, change out of wet clothes.
 - Be aware of the symptoms and take action upon their onset.

- If you recognize hypothermia, take the following steps:
 - Move the patient to shelter.
 - Remove wet clothes and replace them with warm, dry garments.
 - If the victim is alert, give them food and warm liquids to drink.
