

**National Interagency Coordination Center  
Incident Management Situation Report  
Friday, July 6, 2012 – 0530 MT  
National Preparedness Level 4**

**National Fire Activity**

Initial attack activity:	Moderate (274 new fires)
New large fires:	7 (*)
Large fires contained:	5
Uncontained large fires: **	44
Area Command Teams committed:	0
NIMOs committed:	2
Type 1 IMTs committed:	4
Type 2 IMTs committed:	14

\*\* Uncontained large fires include only fires being managed under a full suppression strategy.

[Link](#) to Geographic Area daily reports.

Six MAFFS C-130 aircraft and support personnel have been activated to support wildland fire suppression operations. The MAFFS are from the 302<sup>nd</sup> Airlift Wing, Colorado Springs (US Air Force Reserve), the 146<sup>th</sup> Airlift Wing, Channel Islands (California Air National Guard), and the 153<sup>rd</sup> Airlift Wing, Cheyenne (Wyoming Air National Guard). The aircraft are operating out of Colorado Springs, CO, and Cheyenne, WY.

**Eastern Great Basin Area (PL 4)**

New fires:	9
New large fires:	0
Uncontained large fires:	9
NIMOs committed:	1
Type 2 IMTs committed:	7

**Shingle**, Dixie NF. IMT 2 (Rapp). Six miles south of Duck Creek Village, UT. Timber. Backing fire with isolated torching and short-range spotting. Numerous structures threatened. Evacuations in effect.

**Seeley**, Manti-Lasal NF. IMT 2 (Philbin). Fifteen miles northwest of Huntington, UT. Timber. Creeping and smoldering. Numerous structures threatened. Evacuations in effect. Precipitation occurred over the fire area yesterday.

**Fontenelle**, Bridger-Teton NF. NIMO (Houseman) and IMT 2 (Ourada). Eighteen miles west of Big Piney, WY. Timber. Moderate fire activity with backing, creeping and torching. Structures, gas and oil wells threatened. Evacuations and road closures in effect.

**Clay Springs**, Central Area, Utah DOF. IMT 2 (Walker). Four miles south of Oak City, UT. Timber, brush and grass. Minimal fire activity. Numerous structures, major power lines and gas pipelines threatened. Precipitation occurred over the fire area yesterday.

**Church Camp**, Northern Area, Utah DOF. IMT 2 (Kidd). Twenty-two miles south of Duchesne, UT. Timber and brush. Creeping and smoldering. Numerous structures threatened. Evacuations in effect. Precipitation occurred over the fire area yesterday.

**Quail**, Northwest Area, Utah DOF. IMT 2 (Sommer). One mile east of Alpine, UT. Timber, brush and grass. Creeping and smoldering. Numerous structures threatened. Precipitation occurred over the fire area yesterday.

**Wolf Den**, Vernal District, BLM. IMT 2 (Fillis). Forty miles south of Vernal, UT. Pinyon pine, juniper and brush. Active fire behavior. Oil and gas pipelines threatened. Reduction in acreage due to more accurate mapping.

**Bear Cub**, Bridger-Teton NF. Twenty-two miles east of Moran, WY. Timber. Moderate fire activity. Precipitation occurred over the fire area yesterday.

**Lone Pine**, Payette NF. Thirty miles west of Council, ID. Grass. Creeping and smoldering.

This table does not include fires reported in the large fire section of this report. Updated weekly.

**Predictive Services Discussion:** A stalled front will meander across the northern Great Basin, the central Rockies and through the Plains to the Great Lakes. Showers and thunderstorms will develop along the front and extend southward along the central and southern Rockies. Warmer and drier conditions will develop across the West Coast and western Great Basin. Hot weather will continue in the East with scattered showers and thunderstorms in the Southeast. In Alaska, scattered showers and a few thunderstorms will continue across the South and the Interior.

<http://www.predictiveservices.nifc.gov/outlooks/outlooks.htm>

Today's discussion is from  
"This Day in History"

"Lessons Learned" serve as brief summaries of powerful learning opportunities. You can use these summaries as a foundation and launch point for further dialogue and discussion. Apply these lessons learned to yourself, your crew, and your unit.

**Part IV - South Canyon Fire, Colorado, 1994 (Last of a Four-Part Series)**

**Incident Summary:** On July 2, 1994, seven miles west of Glenwood Springs, Colo., lightning ignites a fire in piñon-pine and juniper on a ridge at the base of Storm King Mountain. The entire general area, in a one-year drought, is experiencing low humidities and record-high temperatures. Over the next two days, the South Canyon Fire increases in size. Initial attack resources are assigned. Four days later, on July 6, a dry cold front moves into the fire area. As winds and fire activity increases, the fire makes several rapid runs. Fourteen firefighters perish as they try to outrun the flames.

**July 6 – Summary of Activities**

A total of 36 fires are now burning on this BLM District. During the night, due to the hazards of rolling rocks, the smokejumpers abandon their line construction on the South Canyon Fire up on Storm King Mountain. The fire continues to flare-up throughout the night. A cold front pushing 30-35 mph winds is predicted to occur by 3 p.m. today. A red flag warning has been issued for these frontal winds.

4:30 a.m.: The 11 firefighters from yesterday return and begin their almost 4-hour hike up the east drainage to the fire—where they clear Helispot 2.

8:45 a.m.: The day's tactical plan calls for improving the fireline on the ridge between helispots 1 and 2. The jumpers and a newly ordered hotshot crew will construct hand line along the fire's edge on its western flank.

9:30 a.m.: The IC and Jumper-in-Charge take a helicopter recon flight. The Jumper-in-Charge and a jumper on ground discuss lack of safety areas on the fire. It is decided to continue with the original suppression plan. At 10:30 a.m., 8 more smoke jumpers land at the fire. They are assigned to reinforce line building on the west flank. By 11 a.m., the hotshot crew arrives at the helibase to be shuttled up to the fire.

12 p.m.: Winds increase—with gusts up to 30 mph.  
12:30 p.m.: The hotshot crew Superintendent and 9 of his crew arrive at Helispot 2. The IC, Jumper-in-Charge, and hotshot Superintendent agree to send these 9 hotshots down the west flank to reinforce the jumpers.

1 p.m.: A flare-up on the west flank forces some of the jumpers to retreat up the fireline toward the top of the ridge. They discuss safety concerns about building this fireline. After a helicopter water drop, they move back down the hill and continue building fireline.

3 p.m.: The remaining 10 hotshots arrive at Helispot 2 to widen hand line and put out spot fires along the ridge. 20 minutes later, the predicted cold front moves into the area. Strong winds immediately increase the fire activity. Within 45 minutes, water drops are no longer effective. The fire makes rapid runs with 100-foot flame lengths. In response, firefighters start walking back up the fireline.

4 p.m.: The fire blows up. It crosses the drainage and runs up the ridge. A spot fire is observed on the east side of the drainage below a retreating crew. 40 mph winds push the blow-up to the ridge in 2 minutes.

Fourteen firefighters who try to outrun the flames perish: *Kathi Beck, Tami Bickett, Scott Blecha, Levi Brinkley, Robert Browning, Doug Dunbar, Terri Hagen, Bonnie Holtby, Rob Johnson, Jon Kelso, Don Mackey, Roger Roth, James Thrash, and Richard Tyler.*

**Lessons Learned Discussion Points**

A primary objective of every operational fire plan is to keep firefighters out of entrapment situations.

- Discuss how the basics of LCES can help prevent getting into an entrapment situation. (Reference page 6 in your IRPG for this discussion.)
- One recommendation from the South Canyon fire review was that every firefighter should carry a radio. Discuss how radios can be used to increase situational awareness.
- Explain why experience alone isn't enough to protect you in an entrapment situation such as the one that took firefighters' lives on the South Canyon Fire.
- What are some tell-tale signs that your work environment is becoming increasingly hazardous?
