Northwest Area (PL 4)

New fires:	0
New large fires:	0
Uncontained large fires:	23
Type 1 IMTs committed:	2
Type 2 IMTs committed:	5

Wenatchee Complex (9 fires), Okanogan/Wenatchee NF. IMT 1 (Pendleton). Two miles west of Wenatchee, WA. Timber, brush and grass. Active fire behavior with short duration crown runs and spotting. Numerous residences threatened. Evacuations in effect.

Table Mountain (5 fires), Okanogan/Wenatchee NF. Transfer of command from IMT 2 (Reed) to IMT 1 (Morcum) will occur today. Sixteen miles east of Cle Elum, WA. Timber, logging slash, brush and grass. Backing fire with torching. Numerous structures threatened. Evacuations in effect.

Okanogan Complex (4 fires), Okanogan/Wenatchee NF. IMT 2 (Williams). Eight miles southeast of Carlton, WA. Timber. Active fire behavior with group tree torching and short-range spotting. Numerous structures threatened. Evacuations in effect.

Pole Creek, Deschutes NF. IMT 2 (Watts). Six miles southwest of Sisters, OR. Timber. Moderate fire activity with short-range spotting. Numerous residences threatened.

Cascade Creek, Gifford Pinchot NF. IMT 2 (LaFave). Eight miles north of Trout Lake, WA. Timber. Backing fire with smoldering.

Yakima Complex, Okanogan/Wenatchee NF. IMT 2 (Johnson). Seventeen miles northwest of Ellensburg, WA. Timber, logging slash, brush and grass. Moderate fire activity with single tree torching and short-range spotting. Structures threatened. Intermittent road closure in effect. Reduction in acreage due to more accurate mapping.

Bear Slide, Warm Springs Agency, BIA. Five miles northeast of Warm Springs, OR. Brush and grass. Creeping and smoldering. No new information. Last report unless significant activity occurs.

Trail 2, Warm Springs Agency, BIA. Eleven miles southwest of Warm Springs, OR. Timber and grass. Creeping and smoldering. Last report unless significant activity occurs.

This table does not include fires reported in the large fire section of this report. Updated weekly.

Predictive Services Discussion: Isolated to widely scattered showers and thunderstorms will move out of the Pacific Northwest and into the northern Great Basin and northern Rockies as an upper low traverses the West. Warm and dry conditions will remain across the Southwest and the southern Rockies. Cool and dry weather will remain in place over the most of the central and eastern U.S. under a strong, Canadian air mass. A few showers will linger across the Northeast.

<http://www.predictiveservices.nifc.gov/outlooks/outlooks.html>

Today's discussion is from the
Fireline Safety Category.

FIRE NOT SCOUTED AND SIZED UP

Watchout Situation #1 comes up during initial attack and **every time** resources arrive at a fire.

- Before taking action on the fire, the following considerations must be addressed:
 - Can you personally observe the fire or must you use scouts? Describe ways you can scout and size up a fire.
 - Do you know the location of the fire perimeter? Discuss situations in which the fire perimeter may not be obvious. (Spotty fires, etc.)
 - Do you know the direction of fire spread? When isn't the direction of fire spread obvious? (Wind shifts, spotty fires, etc.)
 - Does the direction of fire spread increase risk? Talk about situations where you may have to approach the head of the fire. (Hiking down from a helispot, approaching from an existing road, switching winds, etc.)
 - Do you know the fuels and their condition? What kind of information will you assume from what you already know about fuel types? (Spot fires in fir, extreme fire potential in flashy fuels, etc.)
 - Are there aerial resources that can act as lookouts?

- Continued...
 - Do topographic hazards exist? What can you assume from what kind of terrain the fire covers? (Slope, chimneys, aspect, etc.)
 - Does enough information exist to establish a plan of attack? When do you have enough information to begin fighting fire? What do you need to know?
 - Do other dangers exist? Have you talked about factors specific to the area you are working in? (Hunters in the woods, drought, snag patches, etc.)

- To reduce the risks:
 - Post lookouts until the fire is sized up and escape routes and safety zones are established.
 - Retreat if the situation is too complex. Review fires where you had to wait until the area in which you were assigned to work was scouted and sized up before you were allowed onto the fireline.
