

**National Interagency Coordination Center
Incident Management Situation Report
Friday, November 30, 2012 – 0800 MT
National Preparedness Level 1**

National Fire Activity (Weekly Total)

Initial attack activity: Light (543 new fires)
 New large fires: 27 (*)
 Large fires contained: 23
 Uncontained large fires: ** 3
 Area Command Teams committed: 0
 NIMOs committed: 0
 Type 1 IMTs committed: 0
 Type 2 IMTs committed: 0

** Uncontained large fires include only fires being managed under a full suppression strategy.

Southern Area (PL 1)

New fires: 454
 New large fires: 26
 Uncontained large fires: 2

* **High Eagle**, North Carolina DOF. Six miles north of Lenoir, NC. Hardwood litter. Backing fire.

* **Indian Springs**, Oklahoma DOF. Two miles west of Spavinaw, OK. Hardwood litter. Structures threatened. No further information received.

* **Raspberry Mountain**, Ouachita NF. Twenty miles southeast of Mena, AR. Hardwood litter. Backing and flanking fire. Last report unless significant activity occurs.

Predictive Services Discussion: A series of Pacific storms will cross the Northwest and northern Rockies through next week, bringing heavy rain and snow to much of California, the Northwest, the Great Basin, and the northern and central Rockies. The Southwest will remain mostly dry and warm. Windy, warm and dry conditions will continue across the Plains. Scattered rain and thunderstorms will accompany a cold front that will move through the Mississippi Valley and the eastern States by midweek. Temperatures will be mild to warm in the Southeast and cool in the Northeast.

<http://www.predictiveservices.nifc.gov/outlooks/outlooks.html>

Today's discussion is from the
Motorized Operations Category.

Driving Safety

Driving is one of the most hazardous things we do because we literally perform the task hundreds of times in the course of our daily lives we tend to take it for granted. Based on recent accident trends, vehicle accidents are the source of more deaths and serious injuries to wildland firefighters than any other single cause.

- To be a safe driver you have to *want* to be one. Take a good hard look at your driving habits. Are you training yourself to do the right things the right way, like fastening your seat belt, checking your mirrors, and maintaining safe following distances?
- Inattentiveness is a major contributing factor in motor vehicle accidents within the wildland firefighting community. Since the average adult attention span is 15-20 minutes we must develop techniques that allow us to refocus our attention on our driving.
- Many things can lure our attention away from our driving such as: fatigue, eating and drinking, reading directions and maps, writing, cell phone and radio use, conversation within the vehicle and music.
 - ✓ Drive only when you are well rested and alert and avoid driving during the hours of 10:00 PM and 6:00 AM. Take a 10 to 15 minute break after every 2 hours.
 - ✓ Practice situational awareness; be aware of what is happening in front, behind, and on both sides of your vehicle.
 - ✓ Never drive when taking medications that make you drowsy.
 - ✓ Delegate navigation and communication to a passenger or pull over.
 - ✓ By constantly moving your vision, checking mirrors and distant road conditions, you can avoid highway hypnosis and daydreaming.
 - ✓ Avoid eating or drinking while driving.
 - ✓ When talking with passengers, keep your eyes on the road and both hands on the steering wheel. Avoid serious or argumentative conversations.
 - ✓ Do not be in a hurry, be patient.
- Safe driving starts with a safe vehicle. Something as simple as under-inflated tires can have serious consequences. Before operating any vehicle, do a walk-around to look for potential problems, make sure the lights and blinkers work, and adjust your seat and mirrors. If it is the first time you have driven the vehicle, make yourself aware of where everything is.
