

**National Interagency Coordination Center
Incident Management Situation Report
Friday, March 1, 2013 – 0800 MT
National Preparedness Level 1**

National Fire Activity (Weekly Total)

Initial attack activity: Light (179 new fires)
 New large fires: 1 (*)
 Large fires contained: 1
 Uncontained large fires: ** 0
 Area Command Teams committed: 0
 NIMOs committed: 0
 Type 1 IMTs committed: 0
 Type 2 IMTs committed: 0

** Uncontained large fires include only fires being managed under a full suppression strategy.

Predictive Services Discussion: A building ridge will bring a slow warm-up to the West over the weekend, and to the Plains by midweek. A fast moving system will move over the ridge through the northern Rockies, producing scattered snow over the mountains. A deep trough in the East will bring very cold air and a chance for scattered snow to the North, with rain and thunderstorms to the South through the week.

ESCAPE ROUTES

*LCES (Lookouts, Communication, Escape Routes, and Safety Zones)
Category*

An escape route is a preplanned and understood route to reach a safety zone.

- What are the primary concerns in choosing an escape route?
 - Select the closest, least obstructed route.
 - Plan for more than one escape route.
 - Avoid an uphill escape.
 - Scout and clearly mark the route for visibility (aids during smoky situations or night operational periods). NWCG recommends using hot-pink flagging marked “Escape Route” (NFES 0566). Crews with colorblind members may wish to carry and utilize fluorescent chartreuse flagging (NFES # 2396).
 - Determine escape time--consider slowest person, fatigue, and temperature factors.
 - Continuously reassess the situation with regard to work progress and additional resource arrivals.
 - Assure all line personnel are familiar with escape routes.
 - Vehicles parked for escape.
