

**National Interagency Coordination Center
Incident Management Situation Report
Wednesday, June 19, 2013 – 0530 MT
National Preparedness Level 2**

National Fire Activity

Initial attack activity:	Light (107 new fires)
New large fires:	4 (*)
Large fires contained:	1
Uncontained large fires: **	18
Area Command Teams committed:	0
NIMOs committed:	2
Type 1 IMTs committed:	2
Type 2 IMTs committed:	5

** Uncontained large fires include only fires being managed under a full suppression strategy.

Type 2 IMTs committed:	1

Silver, Gila NF. IMT 2 (Reidy). One mile west of Kingston, NM. Timber. Active fire behavior with group tree torching. Structures threatened. Evacuations and area closures in effect.

* **Doce**, Prescott NF. IMT 1 (Sciacca). Eight miles northwest of Prescott, AZ. Timber and brush. Extreme fire behavior with spotting. Numerous structures threatened. Evacuations in effect.

Whites Peak, Cimarron District, New Mexico State Forestry. Fourteen miles southwest of Cimarron, NM. Timber and grass. Creeping and smoldering.

Thompson Ridge, Bernalillo District, New Mexico State Forestry. Ten miles north of Jemez Springs, NM. Timber. Minimal fire behavior.

Jaroso, Santa Fe NF. NIMO (Quesinberry). Eight miles south of Truchas, NM. Timber. Minimal fire behavior.

Tres Lagunas, Las Vegas District, New Mexico State Forestry. Fifteen miles north of Pecos, NM. Timber. Creeping and smoldering. Structures threatened. Area closures in effect.

* **Creek**, San Carlos Agency, BIA. Forty miles northwest of Safford, AZ. Timber. Moderate fire behavior.

Predictive Services Discussion: An upper low will continue to drift across the Northwest, bringing showers and thunderstorms to the Northwest and northern Rockies. Much cooler temperatures will spread to the northern Great Basin and Rockies. Warm and windy conditions will continue across the Southwest, the southern Great Basin and the central Rockies producing critical fire weather conditions for parts of the region. Showers and thunderstorms will develop over the Front Range of the Rockies and move into the Plains from southern Colorado to the Dakotas. Warm weather will continue for most of the South as scattered thunderstorms move through the region. Mild and dry conditions will spread over the Northeast. Alaska will continue hot and dry.

Burn Protocols

First Aid / Health Category

Burn injuries are often difficult to diagnose and may continue to worsen if they do not receive immediate, specialized treatment. The initial evaluation and treatment of these burns often happens in rural medical facilities with limited experience in burn injury care. In the past, this has resulted in evaluation and treatment that did not provide the best care to injured firefighters. Therefore, victims with either severe burns or burns that meet any of the below criteria should be immediately referred and transported to a regional burn center.

- Burn injury criteria identified by the American Burn Association as warranting immediate referral to an accredited burn center.
 - Partial thickness burns (second degree) involving greater than 5% Total Body Surface Area.
 - Burns involving the face, hands, feet, genitalia, perineum, or major joints.
 - Third-degree burns of any size are present.
 - Electrical burns, including lightning injury are present.
 - Inhalation injury is suspected.
 - Burns are accompanied by traumatic injury (such as fractures).
 - Individuals are unable to immediately return to full duty.
- It is imperative that action is expeditious, as burn injuries are often difficult to evaluate and may take 72 hours to manifest themselves. When there is any doubt as to the severity of the injury, the required action is to immediately refer and transport the employee to a regional burn center.
- To ensure that Workers Compensation assistance is provided an agency administrator, or designee, for the incident needs to coordinate with the firefighter's home unit.
- Do you know the location of the closest regional burn center?
 - <http://www.blm.gov/nifc/st/en/prog/fire/im.html>
