

**National Interagency Coordination Center
Incident Management Situation Report
Thursday, July 4, 2013 – 0530 MT
National Preparedness Level 3**

National Fire Activity

Initial attack activity:	Moderate (202 new fires)
New large fires:	9 (*)
Large fires contained:	6
Uncontained large fires: **	33
Area Command Teams committed:	1
NIMOs committed:	0
Type 1 IMTs committed:	5
Type 2 IMTs committed:	10

** Uncontained large fires include only fires being managed under a full suppression strategy.

[Link](#) to Geographic Area daily reports.

Four MAFFS C-130 aircraft and support personnel from the 302nd Airlift Wing, Colorado Springs (US Air Force Reserve), and the 146th Airlift Wing, Channel Islands (California Air National Guard) are supporting wildland fire suppression operations out of Phoenix, AZ.

Southwest Area (PL 4)

New fires:	47
New large fires:	0
Uncontained large fires:	7
Type 1 IMTs committed:	1
Type 2 IMTs committed:	3

Yarnell Hill, Phoenix District, Arizona State Forestry Division. IMT 1 (Reinarz). Four miles west of Yarnell, AZ. Brush and grass. Smoldering with isolated torching. Numerous structures threatened. Evacuations in effect.

Dean Peak, Colorado River District, BLM. IMT 2 (Reidy). Ten miles southeast of Kingman, AZ. Pinyon pine, juniper and brush. Active fire behavior with short crown runs and torching. Numerous structures and communication sites threatened. Evacuations and road closures in effect.

Silver, Gila NF. Transfer of command from IMT 2 (Pierson) back to the local unit will occur tomorrow. One mile west of Kingston, NM. Timber. Creeping and smoldering. Structures threatened. Precipitation occurred over the fire area yesterday.

Jaroso, Santa Fe NF. Transfer of command from IMT 2 (McBratney) back to the local unit will occur today. Eight miles south of Truchas, NM. Timber. Creeping and smoldering. Precipitation occurred over the fire area yesterday.

Beaver, Truxton Canyon Agency, BIA. Fifty-eight miles northwest of Peach Springs, AZ. Brush and grass. Moderate fire behavior. Reduction in acreage due to more accurate mapping.

Doce, Prescott NF. Seven miles northwest of Prescott, AZ. Timber and brush. Creeping and smoldering.

W2, Coronado NF. Nine miles east of Nogales, AZ. Oak, brush and grass. No new information. Last report unless new information is received.

Predictive Services Discussion: Scattered thunderstorms will develop over the Southwest, the Rockies and much of the Great Basin. Storms will produce between 0.25"-0.50" of rain in the Southwest with locally higher amounts. Farther north, most storms will produce less than 0.10" with a few storms reaching up to 0.25". Temperatures will continue a slow decline around much of the West as upper level high pressure weakens. In Alaska, scattered showers and thunderstorms will once again ring the state with only isolated thunderstorms developing in the central and eastern Interior.

<http://www.predictiveservices.nifc.gov/outlooks/outlooks.htm>

“This Day in History” is a brief summary of a powerful learning opportunity. You can use this summary as a foundation and launch point for further dialogue and discussion. Apply these lessons learned to yourself, your crew, your team and your unit.

Part II - South Canyon Fire, Colorado, 1994 (A Four-Part Series)

Incident Summary: On July 2, 1994, seven miles west of Glenwood Springs, Colo., lightning ignites a Bureau of Land Management fire in piñon-pine and juniper on a ridge at the base of Storm King Mountain. The fire, paralleled by two deep canyons, is initially believed to have “little chance” to spread. The past two days, lightning has started 40 new fires on this BLM District. The entire general area, in a one-year drought, is experiencing low humidities and record-high temperatures. Over the next two days, the South Canyon Fire increases in size. Visible from Interstate 70 and nearby residential areas, the public becomes concerned. Some initial attack resources are assigned. Between July 3-6, the fire grows to approximately 2,000 acres. On July 6, a dry cold front moves into the fire area. As winds and fire activity increases, the fire makes several 100-foot flame-length rapid runs within the existing burn—in dense, highly flammable Gambel oak. Fourteen firefighters perish as they try to outrun the flames. The remaining 35 firefighters survive either by escaping down a deep drainage or by seeking a safety area and deploying their fire shelters.

July 4 – Summary of Activities

Today this BLM District has five new fire starts. Two exceed 100 acres. In addition, 31 existing fires remain uncontrolled.

Across the district, fire danger continues to be high to extreme. More lightning is forecast for this evening. Red flag warnings have been issued.

For this area’s current intense, multiple fire load, radio communication is inadequate. It is recognized that this could pose a problem for the safe and effective use of aircraft.

Due to concerns voiced from Glenwood Springs residents, the South Canyon Fire—burning up on Storm King Mountain—receives a higher priority for receiving firefighting resources.

At 6:30 p.m. an Incident Commander, BLM engine crew, and Forest Service firefighters meet at the bottom of the mountain down beneath the fire.

Due to the approaching darkness and steep terrain, the decision is made to hike up to attack the fire the next morning.

Later that evening, an aerial observer reports: *The fire is in steep and inaccessible terrain. It is actively burning in all directions. The area is too steep for crews. It has few, if any, escape routes. Helicopters with buckets would be very effective.*

From noon to 10 p.m. the fire grows from 3 to 11 acres.

Lessons Learned Discussion Points

If your fire crew was assigned to hike up to the fire on Storm King Mountain, how would you:

- Address the inadequate radio communications for ground and aviation resources.
- Appropriately mitigate an unacceptable level of risk. (Reference page 1 in your IRPG for this discussion.)
- Determine when and how to refuse risk. (Reference pages 17-18 in your IRPG for this discussion.)

What would you be thinking about as a Crew Boss, Squad Boss, or Firefighter?
