

**National Interagency Coordination Center  
Incident Management Situation Report  
Friday, September 13, 2013 – 0530 MT  
National Preparedness Level 2**

**National Fire Activity**

Initial attack activity: Light (60 new fires)  
 New large fires: 1 (\*)  
 Large fires contained: 1  
 Uncontained large fires: \*\* 11  
 Area Command Teams committed: 0  
 NIMOs committed: 0  
 Type 1 IMTs committed: 3  
 Type 2 IMTs committed: 0

\*\* Uncontained large fires include only fires being managed under a full suppression strategy.

**Northern California Area (PL 3)**

New fires: 12  
 New large fires: 0  
 Uncontained large fires: 4  
 Type 1 IMTs committed: 2

**Clover**, Shasta-Trinity Unit, Cal Fire. Cal Fire IMT 1 (Smith). Eleven miles west of Anderson, CA. Timber, brush and grass. Minimal fire behavior. Communities of Igo, Ono and Happy Valley are threatened. Evacuations in effect.

**Forks Complex**, Klamath NF. One mile east of Sawyers Bar, CA. Timber and brush. Moderate fire behavior. Structures threatened. Reduction in acreage due to more accurate mapping.

**Morgan**, Santa Clara Unit, Cal Fire. Transfer of command from Cal Fire IMT 1 (Derum) back to the local unit will occur today. Four miles southeast of Clayton, CA. Chaparral. No fire activity.

**Corral Complex**, Six Rivers NF. Ten miles east of Hoopa, CA. Timber and brush. Active fire behavior. Area closures in effect.

**Predictive Services Discussion:** Scattered showers and thunderstorms, some with heavy rain will spread over much of the Great Basin, the northern, central and southern Rockies, and the High Plains of Colorado, Kansas and Nebraska. Widely scattered showers and thunderstorms will also move through New England and parts of the Southeast. Temperatures will remain mild over most of the interior West, the Plains, the Midwest and New England. The Gulf Coast states will continue warm and humid while the West Coast states remain in very warm conditions.

## HAZARD TREE FELLING – SECURE FELLING AREA

*Hazard Tree Category*

**DISCUSSION:** The following fundamental safety principles for tree felling operations have been established based on repeated lessons learned following serious accidents. To protect sawyers, swampers, and operational personnel from exposure to potential traumatic injury or death during tree felling operations, the following safety procedures should be applied to all felling activities. Fireline supervisors should continue to monitor all felling operations to ensure the following safe job procedures are consistently applied:

- A secure felling area, **MINIMUM OF TWO AND ONE HALF (2.5) TIMES THE HEIGHT OF THE MATERIAL BEING FELLED IN ALL DIRECTIONS**, needs to be established and maintained by the faller during all tree felling operations. In addition, the entire downhill side on slopes must be secured if materials can fall/role for a long, unpredictable distance.
- No one shall be permitted in the secured felling area without the authorization of the faller.
- The faller shall establish a safety zone outside the secured area, and direct EVERYONE to remain there until all felling is completed, and an "all clear" has been communicated.
- Safety zones should be established, whenever practical, in the opposite direction of the planned fall, and at a distance of at least 2.5 times the height of the trees being felled.
- The faller shall assign Lookout(s). The lookout(s) shall have reliable communications with the faller, and other personnel adjacent to the secure areas.
- Competent lookouts shall be established and maintained by the faller at all major access points of roads and trails that afford access to the secured felling area.
- The faller will ensure that no hazards remain such as hang-ups, unstable logs, or other dangers before approving access or leaving the secured area
