

**National Interagency Coordination Center
Incident Management Situation Report
Monday, September 16, 2013 – 0530 MT
National Preparedness Level 2**

National Fire Activity

Initial attack activity: Light (59 new fires)
 New large fires: 1 (*)
 Large fires contained: 1
 Uncontained large fires: ** 4
 Area Command Teams committed: 0
 NIMOs committed: 0
 Type 1 IMTs committed: 1
 Type 2 IMTs committed: 3

** Uncontained large fires include only fires being managed under a full suppression strategy.

Predictive Services Discussion: Widely scattered showers and thunderstorms will linger over the central Rockies and the central Plains. Scattered thunderstorms will continue in South Texas and along the Gulf Coast to Florida. Scattered showers will linger over the Northwest and move into the northern Rockies. Temperatures will remain cool to mild over most of the nation with warm to very warm conditions in the Gulf Coast states and the Southwest deserts.

ESCAPE ROUTES (part 3)

*LCES (Lookouts, Communication, Escape Routes, and Safety Zones)
Category*

A primary objective of every operational fire plan is to keep firefighters out of entrapment situations. However, firefighters must always be prepared to escape quickly to a safety zone or deployment area. Consider the following during discussion of escape from possible entrapment.

- Have a plan that includes trigger points!
 - **Trigger Point:** An observable event that triggers a pre-determined action. Example: Temperature reaches 98 Degrees and RH goes into single digits the crew will follow the established escape route to the safety zone.
- Reassess escape routes throughout the operational period.
 - Has access to escape routes become more difficult as the day progresses?
 - Do you have more than one escape route?
 - Are all escape routes clearly marked?
 - Are all firefighters familiar with the escape routes?
- During an escape time will be short. Describe considerations you might make in this situation such as:
 - Maintain control of all critical equipment such as PPE and radio... jettison gear that will not aid in your escape!
 - Maintain contact with all other crewmembers!
- Describe your vision of a good safety zone. How is that different from a deployment area?
- You should always know the location of your escape routes leading to and safety zones and deployment areas.
