

**National Interagency Coordination Center
Incident Management Situation Report
Friday, May 16, 2014 – 0530 MT
National Preparedness Level 2**

National Fire Activity

Initial attack activity: Light (43 new fires)
 New large fires: 4 (*)
 Large fires contained: 1
 Uncontained large fires: ** 9
 Area Command Teams committed: 0
 NIMOs committed: 0
 Type 1 IMTs committed: 1
 Type 2 IMTs committed: 2

** Uncontained large fires include only fires being managed under a full suppression strategy.

Southern California Area (PL 3)

New fires: 2
 New large fires: 4
 Uncontained large fires: 5
 Type 1 IMTs committed 1
 Type 2 IMTs committed 1

* **Tomahawk**, Camp Pendleton Marine Corps Base. IMT 2 (Garwood). One mile northwest of Fallbrook, CA. Chaparral. Active fire behavior. Community of Fallbrook threatened. Evacuations in effect.

* **Cocos**, Monte Vista Unit, Cal Fire. Two miles east of Escondido, CA. Brush. Active fire behavior with spotting. Structures threatened.

* **Bernardo**, Monte Vista Unit, Cal Fire. Two miles east of Fairbanks Ranch, CA. Brush and grass. Minimal fire behavior. Residences threatened.

* **Highway**, Monte Vista Unit, Cal Fire. Six miles southeast of Fallbrook, CA. Chaparral. Active fire behavior. Road closures in effect.

Miguelito, Santa Barbara County. Transfer of command from Cal Fire IMT 1 (Derum) back to the local unit occurred yesterday. Three miles south of Lompoc, CA. Chaparral. Minimal fire behavior. Structures and energy infrastructure threatened.

Predictive Services Discussion: A ridge of high pressure over the Western U.S. will weaken somewhat as it shifts east of the Cascade Mountains today. Although winds over California will be somewhat diminished with onshore flow, it will still remain breezy and unseasonably warm over the Intermountain West. East of the Rocky Mountains, low pressure aloft will keep conditions unsettled with showers and thunderstorms from the Ohio Valley through the Mid Atlantic Coast. Heavy rain will continue to bring flood concerns to the Northeast where it is already saturated.

COMMON DENOMINATORS OF FIRE BEHAVIOR ON TRAGEDY FIRES

Weather / Fire Behavior Category

Five common denominators that contribute to accidents/incidents have been identified through studies of tragedy fires. It is important for firefighters to readily recognize the following common denominators so that future tragedies can be prevented:

- Most incidents happen on smaller fires or on isolated portions of larger fires.
- Most fires are innocent in appearance before unexpected shifts in wind direction and/or speed results in flare-ups or extreme fire behavior. In some cases, tragedies occur in the mop-up stage.
- Flare-ups generally occur in deceptively light fuels, such as grass and light brush.
- Fires run uphill surprisingly fast in chimneys, saddles, gullies, and on steep slopes.
- Some suppression tools, such as helicopters or air tankers, can adversely affect fire behavior. The blasts of air from low-flying helicopters and air tankers have been known to cause flare-ups.
