

**National Interagency Coordination Center  
Incident Management Situation Report  
Monday June 2, 2014 – 0530 MT  
National Preparedness Level 2**

**National Fire Activity**

Initial attack activity: Light (86 new fires)  
 New large fires: 0 (\*)  
 Large fires contained: 0  
 Uncontained large fires: \*\* 4  
 Area Command Teams committed: 0  
 NIMOs committed: 0  
 Type 1 IMTs committed: 0  
 Type 2 IMTs committed: 1

\*\* Uncontained large fires include only fires being managed under a full suppression strategy.

**Southwest Area (PL 3)**

New fires: 10  
 New large fires: 0  
 Uncontained large fires: 2

**Slide**, Coconino NF. Six miles north of Sedona, AZ. Timber. Minimal fire behavior.

**Black River Tank**, Fort Apache Agency, BIA. Twenty-one miles southeast of Whiteriver, AZ. Pinyon pine, juniper and brush. No new information. Last report unless significant activity occurs.

**Galahad**, Grand Canyon NP. Previously reported incident. Twelve miles northwest of North Rim, AZ. Timber. Active fire behavior with single and group tree torching. Last report unless significant activity occurs.

**Predictive Services Discussion:** Several weak upper level disturbances off the Pacific Coast will bring instability and moisture for isolated thunderstorms for the Intermountain West. Showers and thunderstorms with heavy rain are expected to continue along a stalled frontal boundary extending from the Northern Plains through the Upper Mid-West. Showers and thunderstorms are expected to continue over the Southeast U.S. as a closed low pressure system weakens over the area.

## **ATTEMPTING A FRONTAL ASSAULT ON A FIRE**

*Operational Engagement Category*

Attempting a frontal assault on a fire is recognized as Watchout Situation #10 and is a potentially dangerous tactic.

- If your tactics include a frontal assault, the following checklist must be adequately addressed before engaging the fire:
- Has the fire been scouted and sized up? Who will scout and size up a fire and what are they looking for?
- Is your position defensible? List what makes a firefighter's position defensible. (Anchor points, safety zones, escape routes, etc.)
- Are escape routes and safety zones adequate? Review what constitutes an adequate safety zone and escape route.
- Do you have an anchor point? How would you establish an anchor point for a frontal assault on a fire?
- Do you have adequate resources to complete the assault? Discuss things you need to consider; for example, if the frontal assault fails, do you have backup?
- Are you informed on strategy, tactics, and hazards? Consider what could happen if someone has a different approach than you; i.e., the IC has a burnout operation planned while you are attempting frontal assault.
- Is the terrain favorable to holding the fire? Discuss ways the terrain will influence where you will make a stand.
- Are you relying on aircraft for support operation? Any operation, especially frontal assault, should not need air resources to be safe.

In order to reduce the risks, reassess your tactics, post lookouts, identify situations in which firefighters may be enticed to attempt frontal assault on a fire. Review why this may or may not be a good idea.
