

**National Interagency Coordination Center  
Incident Management Situation Report  
Thursday July 3, 2014 – 0530 MT  
National Preparedness Level 2**

**National Fire Activity**

Initial attack activity: Light (157 new fires)  
 New large fires: 6 (\*)  
 Large fires contained: 0  
 Uncontained large fires: \*\* 11  
 Area Command Teams committed: 0  
 NIMOs committed: 0  
 Type 1 IMTs committed: 1  
 Type 2 IMTs committed: 5

\*\* Uncontained large fires include only fires being managed under a full suppression strategy.

**Northern California Area (PL 2)**

New fires: 34  
 New large fires: 1  
 Uncontained large fires: 3  
 Type 1 IMTs committed: 1  
 Type 2 IMTs committed: 1

**Butts**, Sonoma-Lake Napa Unit, Cal Fire. Cal Fire IMT 1 (Smith). Three miles north of Pope Valley, CA. Brush and grass. Active fire behavior with long-range spotting. Numerous residences threatened. Evacuations in effect.

\* **Modoc July Complex**, Modoc NF. IMT 2 (Johnson). Twenty miles southeast of Newell, CA. Brush and grass. Moderate fire behavior.

**Coleman**, Northern California District, BLM. Twenty-five miles east of Fort Bidwell, CA. Juniper, brush and grass. Active fire behavior with isolated torching and short-range spotting. Structures threatened.

**Predictive Services Discussion:** Scattered showers and thunderstorms will spread northward from the Southwest through the Great Basin and central Rockies. Hurricane Arthur will provide flooding rain and strong winds to the Southeast and Mid-Atlantic. As a ridge of high pressure continues to strengthen over the Four Corners region, temperatures will remain very warm across much of the West, the South, and the East. Tranquil weather is expected from the Plains eastward through the Great Lakes.

<http://www.predictiveservices.nifc.gov/outlooks/outlooks.htm>

It's not uncommon to find some element of human factors being discussed in a training venue these days. We talk often on and off the line about situational awareness, decision making, slides and leadership concepts. This was not always the case; this shift in our culture was inspired by the tragic events of July 6<sup>th</sup> 1994 and the loss of 14 firefighters on the South Canyon Fire.

The foundation for this movement towards introspection and the increased emphasis on the individual firefighter was a brought about greatly by the Wildland Firefighter Human Factors Workshop in 1995. *"The goal of the workshop was not to come up with quick solutions, rather to explore the human issues of wildland firefighting and make recommendations to management for corrective actions that would have lasting effects."* The findings from the workshop became the single most culturally influential document of the time.

With a focus on the psychological, cultural and organizational aspects of firefighting, experts introduced new models such as Highly Reliable Organizations (HRO), Recognition Primed Decision Making (RPD), and Crew Resource Management (CRM). These models would become the foundation for the Wildland Fire Leadership curriculum and set in motion a cultural paradigm shift. The following are excerpts from the CRM adapted for fire:

<p><b>Decision making—</b></p> <ul style="list-style-type: none"> <li>• Cross-check information sources</li> <li>• Anticipate consequences of decisions</li> <li>• Use data to generate alternatives</li> <li>• Gather pertinent data before making a decision</li> <li>• Evaluate information and assess resources</li> <li>• Identify alternatives and contingencies</li> <li>• Provide rationale for decision</li> <li>• Acknowledge communication</li> <li>• Repeat information</li> <li>• Reply with a question or comment</li> <li>• Use nonverbal communication appropriately</li> </ul>	<p><b>Leadership—</b></p> <ul style="list-style-type: none"> <li>• Determine tasks to be assigned</li> <li>• Establish procedures to monitor and assess the crew</li> <li>• Inform the crew members of fire assignment progress</li> <li>• Verbalize plans</li> <li>• Discuss ways to improve performance</li> <li>• Ask for input; discuss problems</li> <li>• Tell crew members what to do</li> <li>• Reallocate work in a dynamic situation</li> <li>• Focus crew attention to task</li> <li>• Provide a legitimate avenue for dissent</li> <li>• Provide feedback to crew on performance</li> </ul>
<p><b>Adaptability/flexibility—</b></p> <ul style="list-style-type: none"> <li>• Alter fire plans to meet situation demands</li> <li>• Alter behavior to meet situation demands</li> <li>• Accept constructive criticism and help</li> <li>• Step in and help other crew members</li> <li>• Be receptive to others' ideas</li> </ul>	<p><b>Assertiveness—</b></p> <ul style="list-style-type: none"> <li>• Advocate a specific course of action</li> <li>• State opinions on decisions and procedures even to higher-ranking crew member</li> <li>• Ask questions when uncertain</li> <li>• Make suggestions</li> <li>• Raise questions about procedures</li> </ul>
<p><b>Situational Awareness—</b></p> <ul style="list-style-type: none"> <li>• Identify problems/potential problems</li> <li>• Recognize the need for action</li> <li>• Attempt to determine why discrepancies exist with information before proceeding</li> <li>• Provide information in advance</li> <li>• Demonstrate ongoing awareness of fire assignment progress</li> <li>• Demonstrate awareness of your task performance</li> </ul>	<p><b>Mission Analysis—</b></p> <ul style="list-style-type: none"> <li>• Define tasks based on fire assignment</li> <li>• Structure strategies, tactics, and objectives</li> <li>• Identify potential impact of unplanned events on a fire</li> <li>• Critique existing plans</li> <li>• Devise contingency plans</li> <li>• Question/seek information, data, and ideas related to fire plan</li> </ul>

**Discussion Questions:** 1) *What from the above information can you apply today?*  
 2) *How can you make this information relevant in every operation?*
