

**National Interagency Coordination Center
Incident Management Situation Report
Monday July 7, 2014 – 0530 MT
National Preparedness Level 2**

National Fire Activity

Initial attack activity: Light (185 new fires)
 New large fires: 2 (*)
 Large fires contained: 3
 Uncontained large fires: ** 17
 Area Command Teams committed: 0
 NIMOs committed: 0
 Type 1 IMTs committed: 1
 Type 2 IMTs committed: 4

** Uncontained large fires include only fires being managed under a full suppression strategy.

Northern California Area (PL 3)

New fires: 37
 New large fires: 0
 Uncontained large fires: 4
 Type 1 IMTs committed: 1
 Type 2 IMTs committed: 2

Monticello, Sonoma-Lake Napa Unit, Cal Fire. Cal Fire IMT 1 (Smith). IMT is also managing the Butts fire. Five miles west of Winters, CA. Grass. Moderate fire behavior with spotting. Residences threatened. Evacuations in effect.

Butts, Sonoma-Lake Napa Unit, Cal Fire. Three miles north of Pope Valley, CA. Chaparral. Minimal fire behavior. Numerous residences threatened.

Gulch, Modoc NF. IMT 2 (Johnson). Three miles northwest of Canby, CA. Juniper and brush. Minimal fire behavior. Reduction in acreage due to more accurate mapping.

Coleman, Northern California District, BLM. IMT 2 (Minton). Twenty-five miles east of Fort Bidwell, CA. Juniper, brush and grass. Minimal fire behavior with isolated interior torching. Structures threatened.

Predictive Services Discussion: High pressure will dominate the weather over the Western U.S. with hot and dry conditions. Look for showers and thunderstorms to continue in the Southwest U.S., Great Basin, and the Plains region. Showers and thunderstorms are also expected from the Ohio Valley through New England. The southern plains through Mid-Atlantic will see warming and drying today. In Alaska a low pressure system will bring rain and cooler temperatures to much of the state.

TERRAIN AND FUELS MAKE ESCAPE TO SAFETY ZONES DIFFICULT

Operational Engagement Category

When fighting wildland fires, it is often easy to get committed to areas that put you in Watchout Situation #17. As firefighters progress along the fireline, it is imperative to constantly keep the following considerations in mind:

- Base retreat times on the slowest member of the crew.
- Does the crew's condition allow for fast travel? Discuss physical and mental conditions that could interfere with a crew's ability to travel quickly.
- Will you get adequate warning to make it to your safety zone? Who will you rely on to warn you? How will you ensure that everyone gets the word?
- Can escape routes be improved to make travel to safety zones faster? Are escape routes marked? Review what you have done on past fires to locate, mark, and improve escape routes.
- Will posting more lookouts give adequate warning? Talk about situations where there was more than one firefighter assigned to be lookout.
- To reduce the risks:
 - Consider other tactics that will allow you to be in a safer location. Review fires where you have had to change tactics because escape to safety zones was not adequate.

Have an idea? Have feedback? Share it.
