Northwest Area (PL 4)

New fires:	18
New large fires:	3
Uncontained large fires:	21
Type 1 IMTs committed:	2
Type 2 IMTs committed:	10

Waterman Complex, John Day Unit, Oregon DOF. IMT 2 (D. Johnson) Twenty miles northeast of Mitchell, OR. Timber, brush and grass. Active fire behavior with group torching, crown runs and long-range spotting. Structures threatened. Evacuations in effect. Area and road closures in effect.

Shaniko Butte, Warm Springs Agency, BIA. IMT 2 (Williams). Fifteen miles north of Warm Springs, OR. Juniper, brush and grass. Extreme fire behavior with torching. Numerous structures threatened. Evacuations in effect.

Buzzard, Burns District, BLM. IMT 2 (Watts). Thirteen miles northwest of Riverside, OR. Juniper, brush and grass. No new information.

Mills Canyon, Southeast Region, Washington DNR. IMT 1 (Lewis). IMT is also managing the Chiwaukum Creek fire. Two miles southwest of Entiat, WA. Timber, brush and grass. Creeping and smoldering. Numerous residences threatened. Evacuations in effect.

Chiwaukum Creek, Okanogan/Wenatchee NF. Nine miles northwest of Leavenworth, WA. Timber. Crowning and long-range spotting. Numerous structures threatened. Evacuations and road closures in effect. Reduction in acreage due to more accurate mapping.

Bridge 99 Complex, Deschutes NF. IMT 2 (Fillis). Twenty miles north of Sisters, OR. Mixed conifer, brush and grass. Active fire behavior with torching. Structures threatened. Road closures in effect.

Pittsburg, Wallowa-Whitman NF. IMT 2 (B. Johnson). Twenty-one miles southwest of Grangeville, ID. Timber, brush and grass. Active fire behavior. Residences threatened.

* **Bingham Complex**, Willamette NF. IMT 2 (Nickey). Includes previously reported Bingham Ridge fire. Five miles east of Marion Forks, OR. Timber. Active fire behavior with torching and spotting. Structures threatened.

Sunflower, Umatilla NF. IMT 2 (Wilde). Ten miles north of Monument, OR. Timber. Running fire with torching and spotting. Structures threatened.

Pine Creek, Prineville District, BLM. IMT 2 (Fry). Eleven miles south of Fossil, OR. Brush and grass. Active fire behavior.

Moccasin Hill, Klamath Unit, Oregon DOF. IMT 2 (Cline). Four miles north of Sprague River, OR. Timber and brush. Interior burning with occasional torching.

White River, The Dalles Unit, Oregon DOF. IMT 2 (Buckman). Fifteen miles west of Maupin, OR. Timber. Smoldering with occasional interior torching. Structures threatened.

* **Logging Unit**, Warm Springs Agency, BIA. IMT 1 (Schulte). Twenty-six miles northwest of Warm Springs, OR. Timber. Extreme fire behavior with long-range spotting.

* **R Road**, Spokane District, BLM. Ten miles east of Mansfield, WA. Brush and grass. Running and short-range spotting.

Lamb Ranch, Burns District, BLM. Fifteen miles northwest of Riverside, OR. Juniper, brush and grass. No new information.

Beaver Creek, Burns District, BLM. Twelve miles south of Crane, OR. Juniper, brush and grass. No new information.

Twin Reservoir, Burns District, BLM. Seven miles north of Princeton, OR. Juniper, brush and grass. No new information.

Saddle Draw, Vale District, BLM. Nineteen miles southeast of Crane, OR. Grass. No new information.

Gumboot, Burns District, BLM. Four miles north of Riley, OR. Timber, brush and grass. Moderate fire behavior with interior torching.

290 RN Jack Knife, Prineville District, BLM. Eight miles southeast of Grass Valley, OR. Juniper, brush and grass. Active fire behavior. Structures threatened.

Hurricane Creek, Wallowa-Whitman NF. Four miles southwest of Joseph, OR. Timber. Moderate fire behavior with spotting. Residences threatened. Road closures in effect.

Predictive Services Discussion: Locally breezy and dry conditions are expected in the Pacific Northwest today, especially east of the Cascade Mountains. Scattered wet thunderstorms will develop this afternoon in the southwest U.S and central Rockies, along with isolated storms in northern California, Nevada, central Idaho, and Montana. The southern Plains will also see storms that will be very wet. Dry and cooler weather will prevail over the eastern U.S. today.

<http://www.predictiveservices.nifc.gov/outlooks/outlooks.htm>

This Day in History is a brief summary of a powerful learning opportunity and is not intended to second guess or be judgmental of decisions and actions. Put yourself in the following situation as if you do not know what the outcome will be. What are the conditions? What are you thinking? What are YOU doing?

Battlement Creek Fire, Colorado – July 17th, 1976

It's 1976 and western Colorado is experiencing an unusually severe fire season caused partly by unusual fuel conditions and heavy lightning activity during dry weather. A severe frost in June kills a high percentage of the leaves on Gambel oak which remain on the branches and is considered one of Colorado's most flammable fuels. 10 hour fuels are at 3-5%. A large scale high pressure weather pattern sits over western Colorado allowing for local weather to be influenced by terrain and diurnal winds averaging 10-15 mph in the afternoon with higher gusts. The weather is fair and hot with the temperatures at Grand Junction and Rifle reaching into the mid and upper 90's. A fire is reported 40 miles northeast of Grand Junction, in the Battlement Creek drainage. The fire is burning over an elevation range of 6200-8400 ft on a steep west-facing slope.

Friday July 16, 0630, two hotshot crews from the Coconino NF Arizona arrive at the Battlement Creek fire. This is the seventeenth fire of the first season for the newly formed Mormon Lake Hotshot Crew. The strategy is to prevent western and southern spread. The crews begin a major burnout of the catline (dozer line) from the rocky bluffs (Point A) at about 1615, downhill along the catline toward the Battlement Creek road at the bottom (Point C) ending about 2030. The fire makes an uphill run in oak brush burning out a large portion of the drainage (from the road east to the ridge top) in about 20 minutes. Two "impressive" fire whirls are observed between 1600-1700. The night shift continues the burn out (Point C-D and beyond along the road) but is spotty with considerable unburned fuel remaining. Other night shift crews construct line along the ridge top (Point E to G). Based on Friday's fire behavior, the E-G line is a crucial spot on the fire. Saturday July 17th, 0700, at morning briefing the Mormon Lake crew is assigned to burn out this section of line.

Saturday morning, July 17th - Due to a delay with the helicopter, the Mormon Lake crew does not get to the base of the rock bluff (Point E) until 1100. They are instructed to improve and burn out the line from the rocky bluff to the helispot (Point E-G). The burnout squad consisted of the crew boss, squad boss and 2 crewmembers. The rest of the crew is improving the handline down the ridge top.

At this same time another crew is burning out in the bottom of the draw (Point C-D). The draw burns readily, uphill toward the ridge and the Mormon Lake crew. Neither crew knew of the specific location or assignment of the other.

1400 - 1/3 the way from the rock bluff to the upper helispot, there is a noticeable increase in smoke from the draw below (where the other crew had been burning). The crew boss is instructed to speed up the line improvement squad on toward the safety zone (Point G) and to narrow down and speed up his burnout on down the ridgeline to join the remainder of the crew in the safety zone when his burnout was done. Upslope winds have increased to 25-35 mph.

1425-1440 – The line improvement squad just makes it into the safety zone when the flame front hits the ridge. 200 yards back, the burnout squad radios that they are "trapped". Their escape is blocked by heavy smoke and flames.

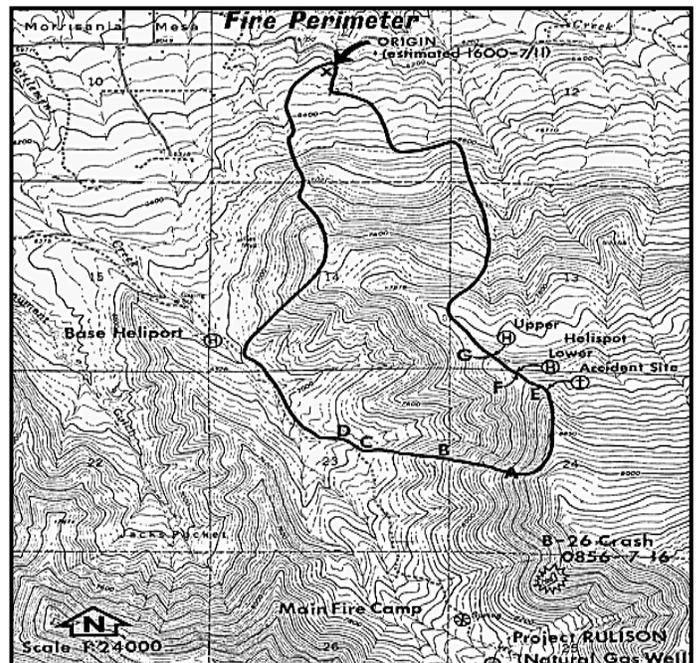

1440 – 1445 – The squad removes their canvas vests to cover their head and face, moistened the vests and their clothes with water from their canteens, and lays face down in the mineral soil of the fireline.

1448 – All four firefighters are very badly burned. Three will lose their lives

Discussion Points

The crew all wore aluminum hardhats, canvas vests, Nomex shirts and non-fire-resistant work pants. Fire shelters were not used. Fire shelters may have prevented serious burns and death at this incident. Policy on issuing and carrying shelters had not been established yet. This incident became the catalyst for the mandatory use of fire shelters and fire resistant clothing.

Action Item: Take this opportunity to inspect, repair or replace your PPE and fire shelter if needed to ensure that it protects you as well as possible.
