

**National Interagency Coordination Center  
Incident Management Situation Report  
Thursday, July 24, 2014 – 0530 MT  
National Preparedness Level 3**

**National Fire Activity**

|                               |                          |
|-------------------------------|--------------------------|
| Initial attack activity:      | Moderate (259 new fires) |
| New large fires:              | 13 (*)                   |
| Large fires contained:        | 2                        |
| Uncontained large fires: **   | 36                       |
| Area Command Teams committed: | 0                        |
| NIMOs committed:              | 1                        |
| Type 1 IMTs committed:        | 5                        |
| Type 2 IMTs committed:        | 12                       |

\*\* Uncontained large fires include only fires being managed under a full suppression strategy.

[Link](#) to Geographic Area daily reports.

Two MAFFS C-130 air tankers and support personnel from the 153<sup>rd</sup> Airlift Wing (Wyoming Air National Guard) have been deployed to Boise, ID to support wildland fire suppression operations in the western U.S.

**Northwest Area (PL 5)**

|                          |    |
|--------------------------|----|
| New fires:               | 92 |
| New large fires:         | 6  |
| Uncontained large fires: | 23 |
| NIMOs committed:         | 1  |
| Type 1 IMTs committed    | 4  |
| Type 2 IMTs committed    | 11 |

\* **Brogan Hill**, Vale District, BLM. Four miles northwest of Brogan, OR. Brush. Active fire behavior with torching and spotting. Structures threatened.

\* **Stemler**, Vale District, BLM. Five miles northeast of Juntura, OR. Brush. Active fire behavior with running and torching. Structures threatened.

\* **Camp Creek**, Vale District, BLM. Eleven miles southeast of Juntura, OR. Brush. Active fire behavior.

\* **Kitten Canyon**, Vale District, BLM. Fifteen miles south of Ironside, OR. Brush. Running fire. Structures threatened.

\* **Juniper**, Vale District, BLM. Ten miles north of Westfall, OR. Brush. Running fire.

\* **Rye Valley**, Vale District, BLM. Fifteen miles northwest of Huntington, OR. Brush. Running fire. Structures threatened.

**Carlton Complex**, Northeast Region, DNR. IMT 1 (Opliger), IMT 2 (Rabe), IMT 2 (Allbee) and NIMO (Hahnenberg). Started on private land seven miles south of Twisp, WA. Timber, light logging slash and brush.

Minimal fire behavior. Numerous residences threatened. Evacuations, area and road closures in effect. Precipitation occurred over the fire area yesterday.

**Chiwaukum Complex**, Okanogan/Wenatchee NF. IMT 1 (Lewis) and IMT 1 (Dueitt). IMT is also managing the Mills Canyon fire. Nine miles northwest of Leavenworth, WA. Timber, heavy logging slash and brush. Minimal fire behavior. Numerous residences threatened. Evacuations, area and road closures in effect. Precipitation occurred over the fire area yesterday.

**Mills Canyon**, Southeast Region, Washington DNR. Two miles southwest of Entiat, WA. Timber, brush and grass. Minimal fire behavior with creeping and smoldering. Area closures in effect.

**Ochoco Complex (2 fires)**, Ochoco NF. IMT 2 (Dunford). Twenty-eight miles east of Prineville, OR. Timber. Moderate fire behavior. Structures threatened. Area closures in effect. Precipitation occurred over the fire area yesterday.

**Logging Unit Complex (5 fires)**, Warm Springs Agency, BIA. IMT 1 (Schulte). Twenty-five miles northwest of Warm Springs, OR. Timber, medium logging slash and brush. Minimal fire behavior with creeping and smoldering. Structures threatened.

**Sunflower**, Umatilla NF. IMT 2 (Wilde). Ten miles north of Monument, OR. Timber and grass. Creeping and smoldering. Precipitation occurred over the fire area yesterday.

**Pine Creek**, Prineville District, BLM. IMT 2 (Fry). IMT is also managing the Donnybrook and Black Rock fires. Eleven miles south of Fossil, OR. Juniper, brush and grass. Smoldering.

**Donnybrook**, Prineville District, BLM. Ten miles southeast of Antelope, OR. Juniper, brush and grass. Smoldering. Precipitation occurred over the fire area yesterday.

**Black Rock**, Prineville District, BLM. Started on private land ten miles east of Antelope, OR. Juniper and grass. Smoldering. Precipitation occurred over the fire area yesterday.

**Waterman Complex**, John Day Unit, Oregon DOF. IMT 2 (Johnson). Twenty miles northeast of Mitchell, OR. Timber, brush and grass. Creeping and smoldering with isolated torching. Structures threatened. Area closures in effect.

**Bridge 99 Complex**, Deschutes NF. IMT 2 (Fillis). Twenty miles north of Sisters, OR. Mixed conifer, brush and grass. Smoldering. Numerous structures threatened. Road and area closures in effect. Precipitation occurred over the fire area yesterday.

**Shaniko Butte**, Warm Springs Agency, BIA. IMT 2 (Williams). Fifteen miles north of Warm Springs, OR. Juniper, brush and grass. Minimal fire behavior. Structures threatened. Precipitation occurred over the fire area yesterday.

**Bingham Complex (2 fires)**, Willamette NF. IMT 2 (Nickey). Five miles east of Marion Forks, OR. Timber. Smoldering. Precipitation occurred over the fire area yesterday.

**Buzzard Complex**, Burns District, BLM. IMT 2 (Watts). Thirteen miles northwest of Riverside, OR. Juniper, brush and grass. Minimal fire behavior. Structures threatened.

**Center**, Prineville District, BLM. Started on private land three miles northeast of Post, OR. Juniper, brush and grass. Minimal fire behavior.

**Lone Mountain 1**, North Cascades NP. IMT 2 (Hutton). Three miles northeast of Stehekin, WA. Timber and brush. Minimal fire behavior. Area closures in effect. Precipitation occurred over the fire area yesterday.

**Predictive Services Discussion:** A cold front associated with a Pacific Northwest low pressure system will continue to move southeast into the northern Rockies and Great Basin. Showers will continue over northern and eastern Washington before moving east into Montana with breezy winds and thunderstorms. Ahead of the cold front it will be breezy across the Great Basin and Rocky Mountain region. Strong storms are anticipated for the northern Plains and Dakotas ahead of a warm front. Warming and drying will begin in earnest today across the southwest quarter of the U.S. including Arizona and California. A cold front stretching from the Gulf Coast to the Carolinas will bring precipitation for much of the southeast U.S.

## Mountain Flying

Aviation Category

This outline is not all inclusive, nor is it directive in nature. Many of the subjects discussed in this outline can be found in non-mountainous areas or at low altitudes. For example, density altitudes over 8500' MSL can be found regularly on the eastern plains of Colorado in the summer. Also, dangerous mechanical and or mountain wave turbulence can be found in areas that aren't usually considered mountainous. Places like the Rocky Mountains / Sierra Front are where all of these concepts can be experienced. In addition, keep in mind that fires in any geographic area can and do produce their own localized weather and the hazards described in this outline can occur in these situations as well.

- **Pilot Ability** - Carefully consider your experience and background before beginning a fire mission into mountainous terrain. Mountain flying in many areas will stretch your abilities to fly the airplane proficiently, navigate, and deal with weather. Consider your ability to react to strong winds and the up and down drafts they may cause. The aircraft gross weight and its effect on performance should be carefully considered.
- **Visibility** - Many experienced mountain pilots recommend having at least 15 miles of visibility before attempting mountain flights. In the fire environment, make sure you have enough visibility to safely maneuver the aircraft to avoid any obstacles. Remember, turn radius is greater due to increased TAS, engine response time is increased and thrust is reduced due to higher density altitudes...give yourself a margin.
- **Winds** - Strong winds can cause some of the most dangerous conditions you'll have to contend with in the mountains. Mountain top winds in excess of 25 knots are indicative of moderate to severe turbulence at ridge top levels as well as the likelihood of very strong up and down drafts. Plan your approach / drop and leave an "out" in case you have to go through dry or encounter unexpected turbulence / down drafts. When encountering a downdraft, maintain sufficient airspeed. Jettison part / all of the load if necessary. Guard against stalling the aircraft and fly out of the downdraft immediately with full power. Proceed to an area of updraft or smoother air. Pay close attention to the forecasts at and above the mountain ridges. In the west, that usually means the 9000' and 12,000' wind forecasts. In the east, you'll look at lower wind level forecasts. Winds above 25 knots at these levels should be a warning sign regarding turbulence and updraft / downdraft potential.
- **Mountain Wave** - When the wind speed is above about 25 knots and flowing perpendicular to the ridge lines, the air flow can form waves, much like water flowing over rocks in a stream bed. The waves form downwind from the ridge line and will be composed of very strong up and down drafts, with the probability of dangerous rotor action under the crests of the waves. If enough moisture is present, (standing) lenticular clouds can form to give a visual indication of the wave action. Standing lenticular clouds are also an indication of moderate to severe turbulence.
- **Winds Through Passes** - Winds flowing through the narrow restriction of a mountain pass tend to increase in velocity. When the winds are forecast above 20 knots, be aware that this phenomenon may cause turbulence and drafts.
