

**National Interagency Coordination Center  
Incident Management Situation Report  
Monday, August 11, 2014 – 0530 MT  
National Preparedness Level 4**

**National Fire Activity**

Initial attack activity:	Light (82 new fires)
New large fires:	2 (*)
Large fires contained:	0
Uncontained large fires: **	32
Area Command Teams committed:	0
NIMOs committed:	1
Type 1 IMTs committed:	9
Type 2 IMTs committed:	18

\*\* Uncontained large fires include only fires being managed under a full suppression strategy.

[Link](#) to Geographic Area daily reports.

Two MAFFS C-130 air tankers and support personnel from the 153<sup>rd</sup> Airlift Wing (Wyoming Air National Guard) have been deployed to Boise, ID to support wildland fire suppression operations in the western U.S.

**Northwest Area (PL 5)**

New fires:	21
New large fires:	1
Uncontained large fires:	17
NIMOs committed:	1
Type 1 IMTs committed:	4
Type 2 IMTs committed:	9

**Devils Elbow Complex** (2 fires), Colville BIA. IMT 2 (Nickey). Thirty miles west of Nespelem, WA. Timber and grass. Active fire behavior with sustained crown runs and spotting. Numerous structures threatened. Evacuations, area and road closures in effect.

**Snag Canyon**, Southeast Region, DNR. IMT 2 (B. Johnson). Started on private land twelve miles north of Ellensburg, WA. Timber, brush and grass. Active fire behavior with short crown runs and short-range spotting. Numerous residences and power infrastructure threatened. Evacuations, area and road closures in effect.

**Hansel Creek**, Southeast Region, DNR. IMT 1 (Schulte). IMT is also managing the Duncan fire and Chiwaukum Complex. Eight miles south of Leavenworth, WA. Timber. Moderate fire behavior with isolated torching. Numerous structures threatened. Evacuations in effect.

**Duncan**, Okanogan/Wenatchee NF. Fifteen miles northwest of Entiat, WA. Timber. Active fire behavior with group torching. Numerous structures threatened.

**Chiwaukum Complex**, Okanogan/Wenatchee NF. Nine miles northwest of Leavenworth, WA. Timber, heavy logging slash and brush. Active fire behavior with group torching and spotting. Numerous structures threatened.

**South Fork Complex** (2 fires), Prineville District, BLM. IMT 1 (Lewis). Twenty miles south of John Day, OR. Timber and grass. Structures threatened. No new information.

**Little Bridge Creek**, Okanogan/Wenatchee NF. Transfer of command from IMT 2 (Leitch) to IMT 1 (Lund) will occur today. Ten miles west of Winthrop, WA. Timber. Moderate fire behavior with group torching and short-range spotting. Numerous residences threatened. Area closure in effect.

**Upper Falls**, Okanogan/Wenatchee NF. Seventeen miles north of Winthrop, WA. Transfer of command from IMT 1 (Blume) to IMT 1 (Lund) will occur today. IMT is also managing the Carlton Complex. Timber. Active fire behavior with crown runs. Structures threatened. Evacuations and area closures in effect.

**Carlton Complex**, Northeast Region, DNR. Started on private land seven miles south of Twisp, WA. Timber, light logging slash and brush. Interior creeping and smoldering. Numerous structures threatened. Evacuations, area and road closures in effect.

**South Cle Elum Ridge**, Okanogan/Wenatchee NF. IMT 2 (Allbee). Seven miles southwest of Cle Elum, WA. Timber. Active fire behavior with isolated torching. Residences threatened. Area closure in effect.

**5 Mile**, Wallowa Unit, Oregon DOF. IMT 2 (D. Johnson). IMT is also managing the Somers fire One mile south of Imnaha, OR. Timber and grass. Minimal fire behavior. Numerous structures threatened.

**Somers**, Wallowa-Whitman NF. Fifteen miles east of Imnaha, OR. Timber and grass. Active fire behavior. Structures threatened.

**Beaver Complex**, Medford Unit, Oregon DOF. IMT 2 (Cline). Twenty-one miles southeast of Ashland, OR. Timber and brush. Minimal fire behavior. Numerous structures and energy infrastructure threatened.

**Staley Complex**, Willamette NF. IMT 2 (Russell). Twenty-eight miles south of Oakridge, OR. Timber. Active fire behavior with isolated torching and short-range spotting. Area closure in effect.

**Bald Sisters**, Malheur NF. IMT 2 (Day) and NIMO (Quesinberry). Twelve miles east of Prairie City, OR. Timber. Creeping and smoldering with isolated torching.

**Rowena**, The Dalles Unit, Oregon DOF. IMT 2 (Buckman). Five miles northwest of The Dalles, OR. Timber, brush and grass. Numerous structures threatened. No new information.

**Bear Butte 2**, Deschutes NF. Twenty-three miles southwest of Warm Springs, OR. Timber and grass. Creeping and smoldering.

**Camp Creek Complex**, Rogue River-Siskiyou NF. Thirty miles northeast of Medford, OR. Timber. Creeping and smoldering with isolated torching.

**Nene Creek**, Warm Springs Agency, BIA. Twenty-two miles north of Warm Springs, OR. Timber, brush and grass. Creeping and smoldering.

\* **Enterprise**, Lake Roosevelt National Recreation Area. One mile west of Enterprise, WA. Timber. Structures threatened. Evacuations in effect. No further information received.

### **Northern California Area (PL 5)**

New fires: 17  
New large fires: 0  
Uncontained large fires: 9  
Type 1 IMTs committed: 5  
Type 2 IMTs committed: 2

**KNF Beaver**, Klamath NF. IMT 2 (M. Johnson). Started on private land nine miles northeast of Horse Creek, CA. Timber and brush. Active fire behavior. Structures threatened. Evacuations, area and road closures in effect.

**Lodge Complex**, Mendocino Unit, Cal Fire. Cal Fire IMT 1 (Derum). Twelve miles northwest of Laytonville, CA. Timber. Active fire behavior with crown runs and spotting. Residences threatened. Evacuations in effect.

**July Complex**, Klamath NF. IMT 1 (McGowan). Four miles east of Sawyers Bar, CA. Timber. Extreme fire behavior with torching and spotting. Structures threatened. Evacuations, road and area closures in effect.

**Log**, Klamath NF. Unified command between IMT 1 (McGowan) and Cal Fire. Six miles west of Greenview, CA. Timber. Active fire behavior with short crown runs and spotting. Numerous structures threatened. Area closures in effect.

**Coffee Complex**, Shasta-Trinity NF. IMT 1 (Pincha-Tulley). Ten miles northwest of Trinity Center, CA. Timber, brush and grass. Active interior burning. Numerous residences threatened. Area closure in effect.

**Eiler**, Lassen NF. Unified command between IMT 2 (Minton) and Cal Fire IMT 1 (Smith). Four miles southeast of Burney, CA. Timber and brush. Moderate fire behavior with spotting. Area closures in effect.

**Bald**, Lassen NF. Transfer of command from IMT 2 (Minton) and Cal Fire IMT 1 (Zombro) back to the local unit will occur today. Eight miles southeast of Fall River Mills, CA. Timber, chaparral and grass. Interior burning with isolated torching. Area closure in effect. Reduction in acreage due to more accurate mapping. Precipitation occurred over the fire area yesterday.

**Day**, Lassen-Modoc Unit, Cal Fire. Twelve miles north of McArthur, CA. Timber and brush. Minimal fire behavior.

**Little Deer**, Klamath NF. Twenty-two miles northeast of Weed, CA. Timber. Creeping and smoldering. Precipitation occurred over the fire area yesterday.

**Predictive Services Discussion:** Scattered thunderstorms will develop from northern California through the Pacific Northwest and into the Great Basin today. Lightning and gusty outflow winds are the main concerns with these storms, though some may produce measurable precipitation. Elsewhere in the Intermountain West, a warming trend will begin today with unseasonably hot temperatures. Rain and thunderstorms will be widespread over the Four Corners region with the northward push of monsoonal moisture under a strengthening ridge of high pressure. Much of the Southeast U.S. can also expect to see showers and thunderstorms today with a series of cold fronts focusing most of the activity.

<http://www.predictiveservices.nifc.gov/outlooks/outlooks.htm>

This Day in History is a brief summary of a powerful learning opportunity and is not intended to second guess or be judgmental of decisions and actions. Put yourself in the following situation as if you do not know what the outcome will be. What are the conditions? What are you thinking? What are YOU doing?

## Helicopter Longline Accident - August 11th, 2004

**Incident Summary:** August 10<sup>th</sup> 2004, firefighters arrive to suppress two lightning fires nearby each other on the Wenatchee National Forest. The area is heavily wooded and mountainous. That evening the firefighters request supplies be flown into a drop zone they have established in a creek bed. The firefighters estimate the trees in the drainage to be an average of 80 feet tall with some 120 foot tall trees near the drop zone. A 150 foot longline is requested. The next morning, a Bell 205 A1 helicopter is dispatched with a tandem sling load to deliver to the firefighters, one net for each fire.

A pink flagging "X" is placed near the stream on a sand bar at the southern end of a cut bank overlooking the sand bar. There is a tall snag located on the cut bank. The helicopters approach is from the SW perpendicular to the drainage and the snag is on the helicopters right side. One of the firefighters establishes communications with the pilot and says that if he doesn't like the drop zone they chose that it is okay to choose his own spot. The pilot acknowledges the firefighter and indicates that he will give it a try. The pilot is not told about the snag. The pilot places both nets on the drop zone; one of the firefighters unhooks their net and re-hooks the load for the other crew. The helicopter begins to lift to depart. Near the top of the snag, the pilot (sitting left seat) slowly turns the nose to the left. The tail of the helicopter strikes the snag causing the helicopter to spin, and impacts the ground just upstream of the drop zone. The pilot is killed.

**Size up** - The snag was cut down and measured at 169'5" tall. Adding the height of the cut bank to the height of the snag, the tree was 172'11" above the drop zone surface. The longline was measured and was 160 feet long. The strike marks were found 15'4" down from the top of the snag.

- **When you and your crew are sizing up a potential cargo drop zone, what are some methods to estimate tree and obstacle height?**

**L** - A pilots' ability to see their surroundings is fairly limited, especially when looking down at an external load. The ability of the ground personnel to see the helicopter in relation to the surrounding hazards can often be better. When a helicopter pilot is working with an external load consider yourself and your crew to be a "Lookout" for that pilot just as you would other members of your crew. Watch the main rotor and tail rotor, not just the load. When any hazard encroaches on the safety circle (zone) communicate it immediately. Never assume that the pilot sees it or that someone else will say something. **IF YOU SEE SOMETHING...SAY SOMETHING.**

- **In addition to trees and snags, as a lookout for a helicopter, what other hazards will you be looking out for?**

**C** - You and your crew must be able to communicate with the pilot by radio. Before the helicopter arrives at your site, brief the pilot on hazards including trees and their estimated height. It is generally considered better to over-estimate the height than to under-estimate it.

- **When communicating to a pilot, how do you refer to the direction of a hazard in reference to the helicopter? (IRPG cover)**

**E** - Helicopters delivering external loads via longline will be flying in the Height-Velocity Curve (aka "dead man's curve", [page 11-1 IHOG](#)) which diminishes the pilot's ability to land safely or recover from a loss of control or power.

- **Consider the pilots and your crews' escape routes if the helicopter were to lose control or power. Where will it go? Where will you go?**

**S** - Consider the safety zone and a safety circle to be very similar places. It needs to be big enough for the helicopter to operate without hazards and is considered to be a minimum of 1 ½ times the rotor diameter. The rotor diameter of this helicopter was 48 feet. The snag was 36 feet from the drop zone marker.

- **Refer to page 49 in your IRPG for safety circle sizes. How big should the safety circle (zone) be for a Type III? Type II? Type 1?**
