

**National Interagency Coordination Center
Incident Management Situation Report
Thursday, September 11, 2014 – 0530 MT
National Preparedness Level 2**

National Fire Activity

Initial attack activity: Light (46 new fires)
 New large fires: 1 (*)
 Large fires contained: 0
 Uncontained large fires: ** 10
 Area Command Teams committed: 0
 NIMOs committed: 0
 Type 1 IMTs committed: 4
 Type 2 IMTs committed: 4

** Uncontained large fires include only fires being managed under a full suppression strategy.

Northern California Area (PL 3)

New fires: 24
 New large fires: 1
 Uncontained large fires: 4
 Type 1 IMTs committed: 1

* **Gulch**, Shasta-Trinity Unit, Cal Fire. Eight miles north of Bella Vista, CA. Chaparral. Active fire behavior with long-range spotting. Numerous residences threatened. Evacuations, road and area closures in effect.

Happy Camp Complex, Klamath NF. IMT 1 (McGowan). One mile east of Happy Camp, CA. Timber, brush and grass. Active fire behavior with with group torching. Numerous structures threatened. Evacuations, road and area closures in effect.

July Complex (2 fires), Klamath NF. Four miles east of Sawyers Bar, CA. Timber. Active fire behavior with short crown runs and spotting. Area closure in effect.

Predictive Services Discussion: Strong, dry East Winds will be channeled offshore west of the Cascade Mountain Range in the Pacific Northwest today as low pressure at the surface is enhanced by an upper level ridge of high pressure strengthening off the Pacific Coast. This will also result in hot and dry weather for California, the Great Basin, and the southwest U.S. An unseasonably strong upper level low pressure system will produce record cold temperatures and blustery winter weather in the northern Rockies and adjacent Plains today. East of the Rockies, another strong cold front will be the focus for widespread showers and thunderstorms stretching from the Great Lakes through the southern Plains region.

LEAD Time

Command Presence

Leadership Category

Leaders often face difficult problems to which there are no simple, clear cut, by-the-book solutions. In these situations, leaders must use their knowledge, skill, experience, education, values, and judgment to make decisions and take or direct action. Command Presence is one element of a leader's effectiveness.

Command Presence is how leaders present themselves to others. More than anything else, the leader's Command Presence sets the tone for the Command Climate within an organization. *(Command Climate refers to the environment within the influence of a particular leader and a good command climate is characterized by open communication, mutual trust and respect, freedom to raise issues and engage in debate, clear and attainable goals, and team-work.)*

Character is the foundation of Command Presence. Leaders reveal their character in every interaction. Leaders must display a combination of personal attributes and behaviors that communicate to others that you are worthy of their trust and respect.

Another component of Command Presence—demeanor—speaks volumes to others. Poise and self-assurance play a large part in your ability as a leader to influence the actions of others.

Fire leaders take charge when in charge, lead from the front and act decisively in order to inspire confidence among team members. In times of crisis, a leader's Command Presence can be the critical factor in determining whether a team succumbs to pressures and dangers or stays focused to seize an opportunity to overcome and succeed.

Discussion Points

- Can you think of a leader with strong Command Presence? What were some of the behaviors that they exhibited?
- Does Command Presence look different for different situations? Explain.
- How do we develop Command Presence?
- Is Command Presence reflected in the 10 Standard Firefighting Orders?
