

**National Interagency Coordination Center  
Incident Management Situation Report  
Saturday, September 27, 2014 – 0530 MT  
National Preparedness Level 2**

**National Fire Activity**

Initial attack activity: Light (26 new fires)  
 New large fires: 1 (\*)  
 Large fires contained: 0  
 Uncontained large fires: \*\* 9  
 Area Command Teams committed: 0  
 NIMOs committed: 0  
 Type 1 IMTs committed: 4  
 Type 2 IMTs committed: 1

\*\* Uncontained large fires include only fires being managed under a full suppression strategy.

[Link](#) to Geographic Area daily reports.

**Northern California Area (PL 3)**

New fires: 4  
 New large fires: 0  
 Uncontained large fires: 2  
 Type 1 IMTs committed: 4

**King**, Amador-El Dorado Unit, Cal Fire. Unified command between IMT 1 (Giachino) and Cal Fire IMT 1 (Smith). Transfer of command from IMT 1 (Smith) to IMT 1 (McGowan) will occur on 9/29. Eleven miles east of Placerville, CA. Timber and grass. Minimal fire behavior. Numerous structures and energy infrastructure threatened. Area closures in effect. Precipitation occurred over the fire area yesterday.

**Happy Camp Complex**, Klamath NF. IMT 1 (Opliger). One mile east of Happy Camp, CA. Timber, brush and grass. Interior smoldering. Area closure in effect. Precipitation occurred over the fire area yesterday.

Incident Name	St	Unit	Size	Size Chge 24 Hrs	% Ctn	Est Ctn	Totl Pers	Pers Chge 24 Hrs	Crw	Eng	Heli	Strc Lost	\$\$ CTD	Origin Own

**Northwest Area (PL 2)**

New fires: 5  
 New large fires: 0  
 Uncontained large fires: 5  
 Type 2 IMTs committed: 1

**36 Pit**, Mt. Hood NF. Transfer of command from IMT 2 (Rabe) back to the local unit occurred yesterday. Eight miles southeast of Estacada, OR. Timber. Minimal fire behavior. Road and area closures in effect.

**Onion Mountain**, Rogue River-Siskiyou NF. Fifteen miles west of Grants Pass, OR. Timber. Decrease in acreage due to more accurate mapping. No further information received.

**Freezeout Ridge**, Wallowa-Whitman NF. Transfer of command from IMT 2 (Kidd) back to the local unit will occur today. Eleven miles southwest of Riggins, ID. Timber. Interior creeping and smoldering. Precipitation occurred over the fire area yesterday. Last report unless significant activity occurs.

**Deception Complex**, Willamette NF. Two miles west of Oakridge, OR. Timber. Smoldering. Road and area closures in effect.

**South Steens Complex** (2 fires). Ten miles north of Fields, OR. Juniper, brush and grass. No new information. Last report unless significant activity occurs.

**Predictive Services Discussion:** An upper level low will slowly move across the West, bringing rain and a few thunderstorms to the Great Basin and the northern Rockies. Some flooding is possible. Rain, with snow at higher elevations, will develop over the Sierras. Much cooler conditions will spread across the West. Scattered showers and thunderstorms will form along the Gulf coast. Most of the country east of the Rockies will have mild conditions.

<http://www.predictiveservices.nifc.gov/outlooks/outlooks.htm>

**Today's discussion is from the  
Fireline Safety Category.**

## **Hazard Trees**

Snags (dead, standing trees without leaves or needles in the crowns) and other hazard trees present a significant hazard to wildland firefighters. Snags typically have much lower fuel moistures than live, green trees; and they burn more readily. In the process, they often throw fire brands far in advance of the main fire and often burn through more quickly than green trees, falling with little or no warning. Live, green trees have been weakened by insects, disease, weather, past fires, and age present equal hazard and can fall without warning.

- The risk of injuries from hazard trees increases during the night operational period when visibility is greatly reduced.
- While the cooler, nighttime period is generally a more effective time to gain control of wildfires, the increased risk from unseen falling snags and weakened live trees may limit the widespread use of crews at night in areas of dead and dying timber.
- Environmental conditions that increase risk from hazard trees: Strong winds or erratic winds from storm cells. Night operations. Air operations - cargo drops, water or retardant drops, helicopter take off/landing, low-level flights. Steep slopes. Diseased or bug-killed areas.
- Things to consider when assessing the potential dangers of hazard trees: Trees have been burning for an extended period. High-risk tree species (those that are known for rot and shallow root systems) are in the area. Numerous downed trees. Dead or broken tips and limbs overhead. Accumulation of downed limbs. Tree decay, cavities, splits, cracks. Absence of needles, bark or limbs. Leaning or hung-up trees. Roots damaged by equipment or erosion.
- Mitigation measures to take: Identify and flag all high-risk areas until the hazard has been removed. Keep personnel out of the high-risk areas until the hazard has been removed. Use saw teams and falling bosses. Establish lookouts. Plan a quick and safe escape route. Do not turn your back on a falling tree. Maintain situational awareness.
