

**National Interagency Coordination Center
Incident Management Situation Report
Friday, October 3, 2014 – 0530 MT
National Preparedness Level 1**

National Fire Activity

Initial attack activity: Light (45 new fires)
 New large fires: 0 (*)
 Large fires contained: 0
 Uncontained large fires: ** 3
 Area Command Teams committed: 0
 NIMOs committed: 0
 Type 1 IMTs committed: 1
 Type 2 IMTs committed: 0

** Uncontained large fires include only fires being managed under a full suppression strategy.

[Link](#) to Geographic Area daily reports.

This will be the last daily Incident Management Situation Report. This report will be posted every Friday at 0800 Mountain Daylight Time unless significant activity occurs.

Northern California Area (PL 2)

New fires: 12
 New large fires: 0
 Uncontained large fires: 1
 Type 1 IMTs committed: 1

King, Amador-El Dorado Unit, Cal Fire. Unified command between IMT 1 (McGowan) and Cal Fire. Eleven miles east of Placerville, CA. Timber and grass. Minimal fire behavior. Area closures in effect. Increase in acreage due to more accurate mapping.

Predictive Services Discussion: The western U.S. can expect unseasonably warm and dry weather as high pressure dominates the pattern. Breezy offshore winds will continue over California through this weekend. In the eastern U.S. a cold upper level low pressure system will bring widespread showers and thunderstorms as well as locally heavy rain and gusty winds as this storm spreads eastward with several reinforcing disturbances moving into the trough from Canada. By mid-week high pressure will begin to build over the eastern U.S. with warming and drying conditions. Remnant moisture from Tropical Storm Simon may curve northeastward into the southern Plains with showers and thunderstorms for next week.

MY SAFETY

Leadership Category

An important aspect of safety is individual responsibility for one's own health & safety. Even with the best supervision, each individual firefighter will occasionally be required to make personal decisions concerning their safety. It is important that individual responsibility be taught as the basis for a viable safety program. Some of those individual responsibilities are:

- Fitness for duty. Begin each work shift both mentally and physically prepared for the rigors of wildland firefighting. Getting adequate sleep, maintaining a healthy diet, and proactively participating in physical training are the foundation of "My Safety".
- Utilization of personal protective equipment. Wear your PPE without being told. Each individual is responsible for performing their own risk assessments. If a hazard is identified that can be mitigated by wearing a particular PPE component it should be utilized. Fireline supervisors have more important duties to focus on other than performing glove patrol.
- Following safe work practices. Using a spotter when backing up vehicles is the prudent and professional course of action. If you are unsure of how to perform a job task safely, ask your supervisor or experienced coworker.
- Using the correct reference materials is an important aspect of safety. You should have a working knowledge of the Red Book, IRPG, and your local operating guidelines.
- Ensure instructions are clearly understood. Communication is a basic responsibility for all fire personnel. Ask appropriate questions to clarify uncertain issues. Speak up when you observe hazards that may place yourself or others at risk.
- Maintain situational awareness at all times. Awareness is a vital component of "My Safety". Pay attention to what is happening around your area of operations. Always display an awareness of what is happening around you by asking questions or making comments.

Summary: Do not expect someone else to be responsible for your safety. Take it upon yourself to make "My Safety" your number one priority.

Discussions points:

1. *Talk about ways you can improve on your safety.*
2. *Have your supervisor talk about their expectations for individual safety.*

Have an idea? Have feedback? Share it.
