

**National Interagency Coordination Center
Incident Management Situation Report
Friday, November 21, 2014 – 0800 MT
National Preparedness Level 1**

National Fire Activity (Weekly Total)

Initial attack activity: Light (228 new fires)
 New large fires: 0 (*)
 Large fires contained: 0
 Uncontained large fires: ** 0
 Area Command Teams committed: 0
 NIMOs committed: 0
 Type 1 IMTs committed: 0
 Type 2 IMTs committed: 0

** Uncontained large fires include only fires being managed under a full suppression strategy.

Predictive Services Discussion: Following bitter cold over the past two weeks, warmer temperatures will gradually develop across much of the nation. Moisture flowing from the Gulf of Mexico will set the stage for locally heavy rain from the southeastern plains and Mississippi Valley to the Appalachian Mountains. Over the Intermountain West, Pacific moisture will produce locally heavy rain and mountain snow in the Northwest, with precipitation spreading into northern California. By the middle of next week, below normal temperatures are anticipated across much of the U.S., with warmer-than-normal weather confined to New England and the western U.S. Below-normal precipitation from California to the central and southern Plains will contrast with above normal precipitation along the East Coast and across northern Plains region.

FIGHT FIRE AGGRESSIVELY, BUT PROVIDE FOR SAFETY FIRST

Operational Engagement Category

Standard Fire Order #10 must be taken into account at all times when fighting fire. In order to fight fire safely and aggressively, every firefighter must be able to answer the following questions:

- Is the suppression method adequate? Ask yourselves, are we making progress? Are we beating our heads against a wall? Is there a better way to get this done? Give examples when you have had to change your suppression method.
- Are there adequate resources and time for effective suppression? Ask yourselves, do we need to retreat and reevaluate? Talk about times when you have realized you weren't getting anywhere and needed to retreat and start managing firefighters and placing orders.
- Are lookouts posted? Discuss when you post lookouts, who you would choose to be a lookout, and where they should be located.
- Are communications prompt with crews and other resources? Review the importance of good communications on the fireline.
- Have escape routes and safety zones been established? Talk about your crew's procedure for establishing escape routes and safety zones. Review what constitutes an escape route and a safety zone.
- Do you feel comfortable with your assignment? Discuss the situation check. Remind firefighters that every individual has the right to question an assignment.
- To reduce the risks:
 - Post lookouts.
 - Retreat if the situation is too complex. Emphasize that safety is everyone's responsibility; we all want to be good firefighters and being safe is part of that.
 - Do you have established trigger points?
