

**National Interagency Coordination Center
Incident Management Situation Report
Friday, December 5, 2014 – 0800 MT
National Preparedness Level 1**

National Fire Activity (Weekly Total)

Initial attack activity: Light (299 new fires)
 New large fires: 9 (*)
 Large fires contained: 8
 Uncontained large fires: ** 1
 Area Command Teams committed: 0
 NIMOs committed: 0
 Type 1 IMTs committed: 0
 Type 2 IMTs committed: 0

** Uncontained large fires include only fires being managed under a full suppression strategy.

[Link](#) to Geographic Area daily reports.

Southern Area (PL 1)

New fires: 256
 New large fires: 8
 Uncontained large fires: 1

* **Overlook**, Osage Agency, BIA. Seven miles northwest of Sand Springs, OK. Hardwood litter, brush and grass. Minimal fire behavior. Precipitation occurred over the fire area yesterday. Last report unless significant activity occurs.

Predictive Services Discussion: A series of upper level disturbances in the Eastern Pacific will bring periods of wet weather to the western U.S. this week. After a brief reprieve Friday and Saturday, the heaviest precipitation will begin Sunday over the coastal mountains of the Pacific Northwest and northern California including the Sierras. To a lesser extent, the Great Basin and Rocky Mountains will also see periodic moisture. By the middle of next week, strong onshore winds may accompany heavy precipitation over the northern half of California. Unsettled conditions are also expected to bring moderate precipitation amounts to the Plains region, the Mid-Atlantic, and Northeast for the first half of next week. Late next week there will be considerable warming and drying for the Southwest and Plains as a ridge of high pressure strengthens over the central U.S.

DRIVING SAFETY

Vehicles/Roads Category

Driving is one of the most hazardous things we do because we literally perform the task hundreds of times in the course of our daily lives we tend to take it for granted. Based on recent accident trends, vehicle accidents are the source of more deaths and serious injuries to wildland firefighters than any other single cause.

- To be a safe driver you have to *want* to be one. Take a good hard look at your driving habits. Are you training yourself to do the right things the right way, like fastening your seat belt, checking your mirrors, and maintaining safe following distances?
- Inattentiveness is a major contributing factor in motor vehicle accidents within the wildland firefighting community. Since the average adult attention span is 15-20 minutes we must develop techniques that allow us to refocus our attention on our driving.
- Many things can lure our attention away from our driving such as: fatigue, eating and drinking, reading directions and maps, writing, cell phone and radio use, conversation within the vehicle and music.
 - ✓ Drive only when you are well rested and alert and avoid driving during the hours of 10:00 PM and 6:00 AM. Take a 10 to 15 minute break after every 2 hours.
 - ✓ Practice situational awareness; be aware of what is happening in front, behind, and on both sides of your vehicle.
 - ✓ Never drive when taking medications that make you drowsy.
 - ✓ Delegate navigation and communication to a passenger or pull over.
 - ✓ By constantly moving your vision, checking mirrors and distant road conditions, you can avoid highway hypnosis and daydreaming.
 - ✓ Avoid eating or drinking while driving.
 - ✓ When talking with passengers, keep your eyes on the road and both hands on the steering wheel. Avoid serious or argumentative conversations.
 - ✓ Do not be in a hurry, be patient.
- Safe driving starts with a safe vehicle. Something as simple as under-inflated tires can have serious consequences. Before operating any vehicle, do a walk-around to look for potential problems, make sure the lights and blinkers work, and adjust your seat and mirrors. If it is the first time you have driven the vehicle, make yourself aware of where everything is.
