

**National Interagency Coordination Center  
Incident Management Situation Report  
Friday, March 6, 2015 – 0800 MT  
National Preparedness Level 1**

**National Fire Activity (Weekly Total)**

Initial attack activity: Light (89 new fires)  
 New large incidents: 1(\*)  
 Large fires contained: 1  
 Uncontained large fires: \*\* 0  
 Area Command Teams committed: 0  
 NIMOs committed: 0  
 Type 1 IMTs committed: 0  
 Type 2 IMTs committed: 0

\*\* Uncontained large fires include only fires being managed under a full suppression strategy.

Additional wildfire information is available through the Geographic Areas at <http://gacc.nifc.gov/>.

**Predictive Services Discussion:** A ridge of high pressure will continue over the western U.S. for the next several days with dry conditions and temperatures well-above normal. Meanwhile, a trough of low pressure over the northeast and another over the southern Plains will continue to dominate the eastern half of the nation with additional opportunities for precipitation. The Great Lakes and northeast U.S. regions will see winter weather, while there is potential for heavy rain from the Gulf Coastal region through the Mid-Atlantic through early next week with temperatures warming up toward normal over the southeast quarter of the country. A series of short wave troughs may weaken the ridge in the west by mid-week with mountain snow and low elevation rainfall, but temperatures should remain above normal.

## The 10 Standard Fire Orders

*Operational Engagement Category*

The orders are arranged according to their importance and grouped in logical sequence. Review and consider Standard Fire Orders as a part of every shift.

- Did you receive or request adequate weather briefing, current and predicted fire behavior, wind direction, predicted humidity, fuel moisture, local factors?
- Do you have map of the fire? Is topography, type of fuels, direction of the spread defined?
- Fire behavior group deals with what the firefighter will encounter - weather, fire status, fire behavior.
  1. Keep informed on fire weather conditions and forecasts.
  2. Know what your fire is doing at all times.
  3. Base all actions on current and expected behavior of the fire.
- Are you familiar with direction, distance, location, size of escape routes and safety zones?
- Discuss the need for lookout, such as extreme fire behavior, fire located out of line-of-sight.
- Discuss importance of the situational awareness.
- Fireline safety group emphasizes personal safety.
  4. Identify escape routes and safety zones and make them known.
  5. Post lookouts when there is possible danger.
  6. Be alert. Keep calm. Think clearly. Act decisively.
- Review importance and means of passing tactical decisions and resource movement.
- Review other factors influencing potential changes in tactics, which could affect control of your forces.
- Organizational Control group is centered around tactical decisions.
  7. Maintain prompt communications with your forces, your supervisor and adjoining forces.
  8. Give clear instructions and insure they are understood.
  9. Maintain control of your forces at all time.
- After you have considered, discussed and acted on the previous nine orders:
  10. Fight fire aggressively, having provided for safety first.
