

**National Interagency Coordination Center  
Incident Management Situation Report  
Sunday, June 7, 2015 – 0530 MT  
National Preparedness Level 1**

**National Fire Activity**

Initial attack activity: Light (91 new fires)  
 New large incidents: 2  
 Large fires contained: 1  
 Uncontained large fires: \*\* 2  
 Area Command Teams committed: 0  
 NIMOs committed: 0  
 Type 1 IMTs committed: 0  
 Type 2 IMTs committed: 0

\*\* Uncontained large fires include only fires being managed under a full suppression strategy.

[Link](#) to Geographic Area daily reports.

**Alaska Area (PL 2)**

New fires: 4  
 New large incidents: 1  
 Uncontained large fires: 0

**Bogus Creek**, Southwest Area, DOF. Started on FWS land 37 miles southwest of Aniak, AK. Short grass. Active fire behavior with running. Structures threatened. Last report unless significant activity occurs.

\* **Innoko River**, Galena Zone, BLM. Started on FWS 120 miles southeast of Unalakleet, AK. Timber. Active fire behavior. Last report unless significant activity occurs.

Incident Name	Unit	Size					Personnel		Resources			Strc Lost	\$\$ CTD	Origin Own

**Southwest Area (PL 2)**

New fires: 20  
 New large incidents: 0  
 Uncontained large fires: 1

**Spring**, Papago Agency, BIA. Twenty miles southeast of Sells, AZ. Brush. Minimal fire behavior. Structures threatened.

**Guadalupe**, Coronado NF. Thirty-five miles southwest of Animas, NM. Brush and short grass. Minimal fire behavior with creeping and smoldering. Structures threatened. Last report unless significant activity occurs.

**Predictive Services Discussion:** A weakening trough of low pressure over the Great Basin will bring scattered showers and thunderstorms to the region, from the Sierra Mountains to the central Rockies and adjacent high Plains. Meanwhile it will remain dry and warm on the periphery of this trough in the Pacific Northwest and Desert Southwest. The Great Lakes region and upper Midwest will see showers and thunderstorms associated with cold front as it moves east. Low pressure over Alaska will continue with scattered showers and isolated thunderstorms across the state.

<http://www.predictiveservices.nifc.gov/outlooks/outlooks.htm>

This report contains information derived from the National Fire and Aviation Management Web Applications (FAMWEB) system and other sources to provide relative information about emerging and ongoing incident activity. This information is considered operational in nature, is subject to change, and therefore may not match official year-to-date agency records.

## NFDRS PocketCards

*Weather/Fire Behavior Category*

The NFDRS PocketCard is a tool for field personnel to locally track outputs of the National Fire Danger Rating System (NFDRS) throughout the fire season. It is based on current and historical weather for a localized area and the area's historic fire occurrence. The PocketCard displays a general assessment of the fire potential and identifies combinations of local weather and fuel conditions that might contribute to severe fire behavior.

### **The PocketCard provides:**

- A general indicator of the potential fire danger for a given rating or protection area.
- A graph showing the trend and status of the current year's fire season.
- A comparison of current year conditions to historical worst and average conditions.
- Fire danger values related to past large or problem fires.
- Critical local thresholds for temperature, humidity, wind speed, and fuel moistures associated with large or problem fires.

### **Discuss the following ways to use the PocketCard:**

- Use it primarily before fires occur, before arriving to a fire. It is also useful during initial fire size-up, initial attack, and extended attack.
- Use it to learn of critical thresholds that predict the potential for extreme fire behavior for the local area. Be aware that local critical thresholds may be occurring earlier in the season.
- Use it to compare current and predicted local fire danger to historical local fire danger to enhance situational awareness.
- Use it to track daily fire danger indices that gauge the potential for weather and fuels to support extreme fire behavior and of the difficulty of control.
- Use it to supplement local experience.
- Use it as a point of reference for firefighters not familiar with the area represented by the card.
- When you receive a fire assignment outside your local area, visit the National PocketCard website at <http://fam.nwcg.gov/fam-web/pocketcards/default.htm> where PocketCards are filed by Geographic Area.
- Put it in the pocket of all your firefighters and keep one in your fire vehicle.
- Post it in dispatch. Use them in briefings. Provide them to incoming crews.
- **Do not use the PocketCard for site specific fire behavior predictions and fireline actions or without an interpretive briefing.**
- Review definitions and implications of ERC and BI values.
