

**National Interagency Coordination Center  
Incident Management Situation Report  
Monday, June 22, 2015 - 0530 MT  
National Preparedness Level 2**

**National Fire Activity**

Initial attack activity:	Light (170 new fires)
New large incidents:	7
Large fires contained:	0
Uncontained large fires: **	21
Area Command Teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	2
Type 2 IMTs committed:	7

\*\* Uncontained large fires include only fires being managed under a full suppression strategy.

[Link](#) to Geographic Area daily reports.

**Alaska Area (PL 5)**

New fires:	64
New large incidents:	5
Uncontained large fires:	12
Type 1 IMTs committed:	1
Type 2 IMTs committed:	3

\* **Rex Complex (two fires)**, Fairbanks Area Forestry, DOF. Started on private land southeast of Clear, AK. Timber, brush and tall grass. Extreme fire behavior with crowning, torching and long-range spotting. Structures threatened. Evacuations, road, area and trail closures in effect.

\* **Nenana Ridge**, Fairbanks Area Forestry, DOF. Twelve miles east of Four Mile Rd, AK. Hardwood litter. Extreme fire behavior.

**Spicer Creek**, Tanana Zone, BLM. IMT2 (Staats). Started on tribal land seven miles northeast of Tanana, AK. Timber. Active fire behavior.

\* **Moose Creek**, Tok Area Forestry, DOF. One mile east of Northway, AK. Timber. Active fire behavior with group torching and short-range spotting. Structures threatened.

**Stetson Creek**, Chugach NF. IMT2 (Goff). IMT is also managing the Juneau Lake fire. Two miles southwest of Cooper Landing, AK. Timber. Minimal fire behavior with backing and creeping. Structures threatened. Area and trail closures in effect.

**Juneau Lake**, Chugach NF. Five miles north of Cooper Landing, AK. Timber and brush. Minimal fire behavior with backing and creeping. Structures threatened. Evacuations, area and trail closures in effect.

**Card Street**, Kenai-Kodiak Area Forestry, DOF. IMT2 (Allbee). Started on tribal land five miles southeast of Sterling, AK. Timber. Moderate fire behavior with single tree torching, creeping and smoldering. Structures threatened. Road, area and trail closures in effect. Reduction in acreage due to more accurate mapping.

**Tanana Slough**, Tok Area Forestry, DOF. Started on tribal land four miles north of Dot Lake, AK. Timber. Moderate fire behavior with isolated torching. Structures threatened.

**Whitefish Lake 1**, Southwest Area, DOF. Previously reported incident. Started on FWS twenty miles southwest of Kalskag, AK. Timber and short grass. Active fire behavior with crowning, torching and smoldering. Structures threatened.

\* **Long Lake**, Tok Area Forestry, DOF. Two miles east of Northway, AK. Timber. Extreme fire behavior with crowning, running and short-range spotting. Structures threatened.

\* **Rock**, Tanana Zone, BLM. Started on tribal land nine miles southeast of Hughes, AK. Tall grass. Active fire behavior. Structures threatened.

**Sockeye**, Mat-Su Area Forestry, DOF. IMT1 (Kurth). Started on private land six miles north of Willow, AK. Timber. Moderate fire behavior with group torching. Numerous structures threatened. Road, area and trail closures in effect.

**Chisana River 2**, Tok Area, DOF. Started on NPS land 25 miles west of Beaver Creek, AK. Timber. Active fire behavior with wind-driven runs and group torching. Structures threatened. Last report unless significant activity occurs.

**Predictive Services Discussion** An upper level ridge of high pressure is stretched across the southern half of the U.S. This will bring very hot and dry weather overall, with above normal temperatures along with single digit humidity continuing in portions of the western U.S. It will be breezy over the mountainous terrain of California and the Southwest, as well as the Rocky Mountains and adjacent Plains where strong westerly flow aloft is mixing to the surface. Showers and thunderstorms will form north of a stationary front in the Great Lakes region, as a trough of low pressure aloft moves east with heavy rain and flooding possible. Weak high pressure aloft remains over Alaska with warm and relatively dry conditions, but enough instability for isolated to scattered thunderstorms for the southern interior.

<http://www.predictiveservices.nifc.gov/outlooks/outlooks.htm>

This report contains information derived from the National Fire and Aviation Management Web Applications (FAMWEB) system and other sources to provide relative information about emerging and ongoing incident activity. This information is considered operational in nature, is subject to change, and therefore may not match official year-to-date agency records.

## Mine Features and Hazards

*Miscellaneous Fireline Hazards*

When working in the area known or suspected for past mining activities, be aware of the serious hazard which may or may not be visible.

- **Surface Features at Abandoned Mines:** Mine buildings (mill sites, assorted support structures) waste rock dumps, glory holes (large open pits), trenches and shallow pits, tailing piles, and other chemical hazards (explosives, 55-gal drums, meth lab supplies).
- **Underground Features:** Vertical openings-shafts, winzes, raises, ore chutes, stopes, ladders, stulls, horizontal openings (often contain an unforeseen vertical component), adits (single opening) and tunnels (two openings).
- **Hazards associated with these features:** Rock fall (near portals, highwalls, shaft collars or ore chutes), collapse and entrapment while underground, instability or perimeter of overhanging rock, slips, trips, and falls (especially down a winze/shaft inside an adit), mine gases (carbon monoxide, hydrogen sulfide, methane, etc), entanglement on wiring and debris within puddles, collision between your head and the overlying rock, unknown substances, explosives, blasting caps or chemicals.
