

**National Interagency Coordination Center
Incident Management Situation Report
Sunday, August 9, 2015 - 0530 MT
National Preparedness Level 4**

National Fire Activity

Initial attack activity:	Light (91 new fires)
New large incidents:	2
Large fires contained:	3
Uncontained large fires: **	56
Area Command Teams committed:	1
NIMOs committed:	0
Type 1 IMTs committed:	8
Type 2 IMTs committed:	9

** Uncontained large fires include only fires being managed under a full suppression strategy.

[Link](#) to Geographic Area daily reports.

Four MAFFS C-130 air tankers and support personnel from the 146th Airlift Wing (California Air National Guard) and the 302nd Airlift Wing (Colorado Springs, Air Force Reserve) have been deployed to McClellan, CA in support of wildland fire operations.

Northern California Area (PL 5)

New fires:	32
New large incidents:	0
Uncontained large fires:	34
Area Command Teams committed:	1
Type 1 IMTs committed:	4
Type 2 IMTs committed:	3

Area Command Team (Van Bruggen) is assigned to the Shasta-Trinity and Six Rivers National Forests for large fire support.

Fork Complex (5 fires), Shasta-Trinity NF. Unified command between IMT 1 (Opliger) and Cal Fire. Three miles east of Hayfork, CA. Timber, light logging slash and chaparral. Moderate fire behavior with torching and backing. Numerous structures threatened. Evacuations, road, area and trail closures in effect.

South Complex (5 fires), Shasta-Trinity NF. IMT 2 (Young). Five miles north of Hyampom, CA. Timber and brush. Active fire behavior with crowning, uphill runs and single tree torching. Numerous structures threatened. Road and area closures in effect.

Mad River Complex (3 fires), Six Rivers NF. IMT 1 (Minton). Eight miles south of Mad River, CA. Timber, chaparral and tall grass. Moderate fire behavior with single tree torching, flanking and backing. Numerous structures threatened. Road, area and trail closures in effect.

River Complex (2 fires), Shasta-Trinity NF. IMT 1 (VonTillow). Three miles southwest of Denny, CA. Timber, chaparral and tall grass. Active fire behavior with uphill runs, torching and backing. Structures threatened. Evacuations, road, area and trail closures in effect.

Route Complex (3 fires), Six Rivers NF. IMT 2 (Walker). Six miles north of Hyampom, CA. Timber, chaparral and tall grass. Active fire behavior with uphill runs, isolated torching and backing. Numerous structures threatened. Road, area and trail closures in effect.

Dodge, Northern California District, BLM. Seventeen miles northeast of Ravendale, CA. Timber, brush and short grass. Minimal fire behavior with creeping and smoldering. Structures and sage-grouse habitat threatened.

Humboldt Complex (7 fires), Humboldt-Del Norte Unit, Cal Fire. Five miles west of Phillipsville, CA. Timber. Moderate fire behavior with running, backing and creeping.

Rocky, Sonoma-Lake Napa Unit, Cal Fire. Cal Fire IMT 1 (Patterson). Six miles east of Lower Lake, CA. Timber, chaparral and brush. Moderate fire behavior with creeping and smoldering.

Gasquet Complex (5 fires), Six Rivers NF. IMT 2 (Garwood). Thirteen miles northeast of Crescent City, CA. Timber, brush and tall grass. Moderate fire behavior with spotting, backing and creeping. Structures threatened. Road and trail closures in effect.

Nickowitz, Six Rivers NF. Fifteen miles west of Somes Bar, CA. Timber, chaparral and brush. Active fire behavior with short-range spotting and group torching.

Lowell, Nevada-Yuba-Placer Unit, Cal Fire. Two miles west of Gold Run, CA. Timber. Minimal fire behavior with smoldering. Structures threatened. Road, area and trail closures in effect.

New fires: 16
 New large incidents: 1
 Uncontained large fires: 12
 Type 1 IMTs committed: 3
 Type 2 IMTs committed: 5

Wolverine, Okanogan-Wenatchee NF. IMT 1 (Schulte). IMT is also managing the Goode and Blankenship fires. Three miles northwest of Lucerne, WA. Timber. Active fire behavior with torching, spotting and wind-driven runs. Numerous structures threatened. Evacuations, road, area and trail closures in effect.

Goode, North Cascades, NPS. Nineteen miles southeast of Newhalem, WA. Timber and brush. Moderate fire behavior with single tree torching and backing. Trail closures in effect. Reduction in acreage due to more accurate mapping.

Blankenship, Okanogan-Wenatchee NF. Fifteen miles northwest of Lucerne, WA. Timber. Minimal fire behavior with single tree torching, creeping and smoldering. Trail closures in effect. Reduction in acreage due to more accurate mapping.

Phillips Creek, Umatilla NF. IMT 2 (Fillis). Seven miles northwest of Elgin, OR. Timber and short grass. Active fire behavior with group torching. Numerous structures threatened. Road, area and trail closures in effect.

Stouts Creek, South Unit, ODF. ODF IMT 1 (Buckman). Sixteen miles east of Canyonville, OR. Timber and medium logging slash. Moderate fire behavior with flanking and creeping. Numerous structures threatened. Road and area closures in effect.

Baldy, Colville NF. IMT 2 (Gales). Six miles northwest of Lone, WA. Timber, light logging slash and closed timber litter. Active fire behavior with short crown runs, group torching and backing. Structures threatened. Road, area and trail closures in effect.

Collier Butte, Rogue River-Siskiyou NF. IMT 2 (Johnson). Eighteen miles east of Gold Beach, OR. Timber and brush. Moderate fire behavior with short-range spotting, flanking and backing. Structures threatened. Road, area and trail closures in effect.

National Creek Complex (2 fires), Rogue River-Siskiyou NF. IMT 2 (Hutton). Timber. Active fire behavior with running, group torching and short-range spotting. Trail closures in effect.

Cable Crossing, Central Unit, ODF. ODF IMT 1 (Smith). Six miles east of Glide, OR. Timber, medium logging slash and brush. Minimal fire behavior with smoldering. Road and area closures in effect.

Hwy 8, Washington State Fire Marshal's Office, DNR. IMT 2 (Allbee). Two miles northwest of Roosevelt, WA. Tall grass. Moderate fire behavior with wind-driven runs, creeping and smoldering. Structures threatened. Road and area closures in effect.

* **Coulee Hite**, Northeast Region, DNR. Five miles northwest of Airway Heights, WA. Timber and short grass. Active fire behavior with wind-driven runs and group torching. Numerous structures threatened.

Lime Hill, Vale District, BLM. Five miles west of Huntington, OR. Brush and short grass. Minimal fire behavior with smoldering. Sage-grouse habitat threatened.

DL Potter Mountain, Umpqua NF. Fifty-one miles east of Roseburg, OR. Closed timber litter. Moderate fire behavior with single tree torching, backing and creeping. Area closures in effect.

153 West Fork, Malheur NF. Ten miles southeast of Dayville, OR. Timber. Moderate fire behavior. Structures threatened. Road, area and trail closures in effect.

Predictive Services Discussion: Drier and warmer weather will return to the West. A few showers will approach the Northwest coast ahead of a cold front. Showers and thunderstorms will continue across the northern Plains and the Great Lakes region. A few thunderstorms will form along the Southeast coast. Very hot and humid conditions will continue in the south central U.S. while the Midwest and East Coast remain mild. In Alaska, scattered showers will increase across the Interior and the South as temperatures continue to fall statewide.

This Day in History is a brief summary of a powerful learning opportunity and is not intended to second guess or be judgmental of decisions and actions. Put yourself in the following situation as if you do not know what the outcome will be. What are the conditions? What are you thinking? What are YOU doing?

Sadler Fire Entrapment – August 9th 1999 - Nevada

On August 5, 1999, a dry lightning storm passes through northern Nevada that ignites numerous fires. Due to a wet winter and spring, the fuels are abnormally heavy. Now, deep into summer, these fuels are measuring less than 80% live fuel moisture. Normal fire suppression tactics have not been effective on previous fires, particularly direct attack and burning operations during the heat of the day. The weather and fire behavior forecasts predict extreme burning conditions. This same day as the lightning storm, a Type 2 crew—the GNP3—is assembled in California. This crew consists of 21 members (17 FFT2s) from fuels and suppression modules as well as non-fire and overhead positions from various home units. The following day, they are dispatched to the Sadler Complex south of Elko, Nevada. During the next two days, they work on the fireline. The next day, August 9, while conducting a burnout operation, six firefighters from the GNP3 crew are entrapped by wildfire.

0600 Briefing starts unannounced and several crews and overhead miss some or all of it. Briefing places little emphasis on a red flag warning that has been issued for high winds, low RH, and unstable atmospheric conditions. The IAP forecast calls for extreme fire behavior with high rates of spread, south winds increasing in afternoon, minimum RH 6-12%, Haines Index of 6, max temp 85-91, and FDFM of 3%. However, there are not enough IAPs for everyone—including the GNP3 crew boss and a DIVS. Extreme fire behavior is discussed at the GNP3 crew briefing and is characterized as “normal”.

0900 GNP3 is assigned to support 2 Interagency Hotshot Crews asked to burnout from Big Safety Zone to the NW and the dozer line to Black Safety Zone. The dozer line is about ½ mile north of the head of the fire.

1100 After a recon, the hotshot superintendents refuse to accept burnout assignment until the line south of Big Safety Zone is secure. The DIVS and the 2 IHCs leave to do the other burnout. GNP3 waits.

1300 GNP3 accepts assignment to burn out across the head of the fire from Black Safety Zone going east to the “Y”.

1400 Ignition is delayed due to unfavorable winds. Overhead feels if they “didn’t attempt a burn, the fire would get away”. Plan is changed to burnout from the east to the west instead—the very plan that the hotshots had refused.

1430 Due to concerns regarding GPN3 crew’s lack of experience and fitness, only 3 members and the crew boss are used for the firing operation.

1500 This squad begins firing from the “Y”—without an anchor point—supported by an engine. The fireline behind them is unsecured. Due to hills, no one on the burnout squad can see the main fire. There are no aircraft to assist as lookout. Because of occasional wind shifts, the igniters must walk very fast and occasionally trot to keep ahead of their fire. They are unable to use the black as a safety zone. For these burning conditions, safety zones along the dozer line are too small and too far apart.

1515 Back behind the firing squad, the engine is very busy picking up multiple spot fires and slopovers. The engine captain radios to stop ignition. There is no response. The same tactical channel is also being used by the other burnout and is overloaded with traffic.

1530 Half way through the 1.3 mile burnout, two more GNP3 members join the firing squad.

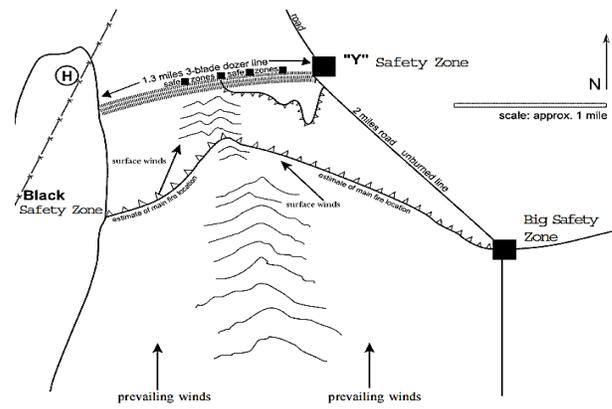

1540 Overhead watching the burnout sees the main fire become visible and take off down the hill toward the squad. They attempt to warn the squad but are unable to make radio contact. Shortly after, the main fire becomes visible to the squad as it crests the ridge to the south. It is described as a “river of fire” as it makes a run at the dozer line and the crew at speeds in excess of 300 chains per hour with 15 ft. flame lengths.

The engine is cut off from the squad and retreats to a safety zone. The order to “run” is given to the firing squad. Tools and gear are dropped on the way to the safety zone, almost 600 ft. away. Several crewmembers unsuccessfully attempt to deploy their fire shelters.

Crew members receive 1st and 2nd degree burns and smoke inhalation. An injured crewmember, an EMT, suffering from smoke inhalation, is asked to provide first aid for the others.

Lessons Learned Discussion Points

- *What are your responsibilities if you are asking another resource to take an assignment that has previously been turned down?*
- *The burnout was a potentially dangerous assignment. What will you do to size up your resource’s capabilities and experience and assign them to appropriate tasks?*
- *As a crew/crewmember, you have a responsibility to look after your own safety—which includes the right to accept or reject an assignment. Have everyone turn to page 19 in the IRPG to discuss how to properly refuse risk.*
- *Discuss how you and your crew would apply LCES throughout the day on this incident.*

2. Location of the firing squad on August 9, 1999 at around 3:30 p.m.
