

**National Interagency Coordination Center
Incident Management Situation Report
Friday, May 27, 2016 – 0800 MT
National Preparedness Level 1**

National Fire Activity (May 20 – May 26)

Initial attack activity:	Light (466 new fires)
New large incidents:	11
Large fires contained:	4
Uncontained large fires:**	4
Area Command Teams Committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	0
Type 2 IMTs committed:	2

**Uncontained large fires include only fires being managed under a full suppression strategy.
[Link](#) to Geographic Area daily reports.

Ten wildland fire suppression crews are assigned to support large fires in Alberta, Canada.

Southwest Area (PL 3)

New fires:	62
New large incidents:	9
Uncontained large fires:	3

Coyote, Guadalupe Mountains NP. IMT 2 (Nieto). Six miles northwest of Pine Springs, TX. Timber, chaparral and brush. Moderate fire behavior with flanking, backing and creeping. Structures threatened. Road, area and trail closures in effect.

* **Paddy Creek**, Fort Apache Agency, BIA. Twenty-six miles southeast of Whiteriver, AZ. Timber. Moderate fire behavior with flanking, single tree torching, and short-range spotting. Area closures in effect.

* **Juniper**, Tonto NF. Ten miles south of Young, AZ. Timber and chaparral. Moderate fire behavior with backing. Area closures in effect. Last report unless significant activity occurs.

* **North**, Cibola NF. Twenty five miles southwest of Magdalena, NM. Timber. Moderate fire behavior with flanking and backing. Last report unless significant activity occurs.

* **Mormon**, Coconino NF. Six miles east of Munds Park, AZ. Closed timber litter. Moderate fire behavior with flanking, backing and isolated torching. Last report unless significant activity occurs.

* **Cowboy**, Coconino NF. Nine miles south of Flagstaff, AZ. Timber. Moderate fire behavior with flanking, backing and isolated torching. Last report unless significant activity occurs.

* **Pivot Rock**, Coconino NF. Eight miles northeast of Pine, AZ. Timber. Moderate fire behavior with flanking, backing and isolated torching. Last report unless significant activity occurs.

* **Spur**, Gila NF. Ten miles north of Reserve, NM. Timber and brush. Moderate fire behavior with flanking and backing. Last report unless significant activity occurs.

La Sierra, Coronado NF. Nine miles northwest of Nogales, AZ. Short grass and chaparral. Minimal fire behavior.

* **Gordon**, Colorado River Agency, BIA. Fifteen miles southwest of Vidal, CA. Chaparral, brush and grass. Minimal fire behavior.

Predictive Services Discussion: A broad trough will remain over the West with a ridge in the East. A series of smaller upper level lows will move through the western trough, bringing scattered showers and thunderstorms to the Intermountain region, especially across the Great Basin and the northern Rockies. Persistent southwesterly flow through the central U.S. will bring strong thunderstorms to the Plains while scattered rain and thunderstorms develop over the eastern States. Temperatures will remain very warm with high humidity across the central and eastern U.S. Mild conditions in the West will gradually warm through week. A persistent ridge over Alaska will keep warm and dry conditions for most of the state through the week. Downslope winds will affect the Alaska Range over the weekend.

UNINFORMED ON STRATEGY, TACTICS OR HAZARDS

Operational Engagement

Firefighters who are uninformed on strategy, tactics or hazards are in conflict with Watchout Situation #5. Before going to the fireline, it is imperative that firefighters obtain information about strategies, tactics or hazards by asking themselves the following questions:

- Can communications be established to find out strategy, tactics or hazards? Discuss ways you might establish communications; for example, contacting someone who is already on the fire and asking them what tactics and strategies are working or not working, what hazards they have witnessed, etc.
- Can scouting safely identify potential hazards? Talk about different methods of scouting a fire (e.g., using a lookout from your crew or sending a line scout ahead, utilizing air attack or the spotter on a smokejumper airplane). Discuss what types of hazards you might come across and ways you would mitigate them. For example, arriving at a fire after dark and a being instructed to dig line downhill with the fire below. How could you make this a safe situation?
- Have strategies, tactics or hazards changed since last informed? Discuss situations that might alter the way you are fighting a fire (e.g., wind shifts, resources you expected don't arrive, etc.). Also, think about what new hazards can develop while you are on the fireline (e.g., roots burning out and trees coming down, winds shifting direction and speed, etc.)
- Can you get a briefing from your supervisor? Talk about the importance of constant communications and ensuring firefighters are on the same page with strategies and tactics. For example, if one crew decides to do a burnout, but doesn't let the crew at the other end of the line know what they are doing, then what can happen?
- To reduce the risks:
 - Post lookouts.
 - Determine escape routes and establish safety zones.
 - Consider retreating until you are informed.
 - Don't leave a staging area or operational briefing until you have all the pertinent information. Emphasize ways to inform firefighters about strategies, tactics and hazards. Tell a story about when you were uninformed and what you did to correct the situation so that you were safe.
 - Use the Incident Response Pocket Guide standard briefing

Have an idea? Have feedback? Share it.
