

**National Interagency Coordination Center  
Incident Management Situation Report  
Thursday, June 2, 2016 – 0530 MT  
National Preparedness Level 1**

**National Fire Activity**

Initial attack activity:	Light (101 new fires)
New large incidents:	3
Large fires contained:	0
Uncontained large fires:**	5
Area Command Teams Committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	0
Type 2 IMTs committed:	1

\*\*Uncontained large fires include only fires being managed under a full suppression strategy. [Link](#) to Geographic Area daily reports.

Ten wildland fire suppression crews are assigned to support large fires in Alberta, Canada.

**Southern California Area (PL 2)**

New fires:	17
New large incidents:	1
Uncontained large fires:	1
Type 2 IMTs committed:	1

\* **Chimney**, Central California District, BLM. IMT 2 (Mills). Ten miles west of Pearsonville, CA. Hardwood slash, brush and grass. Active fire behavior with uphill runs and torching. Structures threatened. Road, trail and area closures in effect.

Incident Name	Unit	Size		%	Ctn/ Comp	Est	Personnel		Resources			Strc Lost	\$\$ CTD	Origin Own
		Acres	Chge				Total	Chge	Crw	Eng	Heli			
* Chimney	CA-CND	1,010	---	0	Ctn	6/6	285	---	9	11	1	0	500K	BLM

**Southwest Area (PL 3)**

New fires:	29
New large incidents:	2
Uncontained large fires:	2

\* **Mule Ridge**, Coronado NF. Two miles south of Ruby, AZ. Brush and short grass. Active fire behavior with running.

**North**, Cibola NF. Twenty five miles southwest of Magdalena, NM. Timber. Moderate fire behavior with flanking, backing and creeping. Structures threatened. Road, area and trail closures in effect. Last report unless significant activity occurs.

**Pivot Rock**, Coconino NF. Eight miles northeast of Pine, AZ. Timber. Active fire behavior with backing, isolated torching and smoldering. Last report unless significant activity occurs.

**Mormon**, Coconino NF. Previously reported incident. Six miles east of Munds Park, AZ. Closed timber litter. Active fire behavior with flanking, backing and isolated torching. Last report unless significant activity occurs.

\* **Portal Peak**, Coronado NF. Three miles south of Portal, AZ. Brush and short grass. Smoldering. Last report unless significant activity occurs.

**Paddy Creek**, Fort Apache Agency, BIA. Twenty-six miles southeast of Whiteriver, AZ. Timber. No new information.

**Predictive Services Discussion:** A slow moving upper low will cross the south central U.S. A ridge will build over the southwestern U.S. Strong thunderstorms will form over the southern Plains and lower Mississippi, producing another day of potential flooding for the region. Showers and thunderstorms will also form along a cold front from the Mid-Mississippi to New York while thunderstorms associated with the remnants of Tropical Storm Bonnie continue over the Mid-Atlantic region. In the West, isolated thunderstorms will form along the Rockies while temperatures soar under the building ridge over the Southwest. Mild conditions will persist over most of the rest of the nation except for warm and humid conditions in the Southeast. In Alaska, scattered showers will increase around the state, especially in the east and south. Temperatures will be cooler most areas.

## Proper Use of Trigger Points

*Weather/Fire Behavior Category*

Accurate situational awareness (SA) requires constant reassessment of conditions (existing or potential) that may impact the safety and effectiveness of tactics. Monitoring for the 18 Watchout Situations and establishing operational / environmental limits (“trigger points”) ahead of time can help to focus SA, prompt reassessment, and help you re-evaluate the risk of current actions. The following items are things to consider in your planning and discussion. Remember, trigger points are NOT decision makers, but serve as predetermined cues to prompt you to re-evaluate the current and potential situation and associated risks, and help you to determine and implement the proper course of action.

- Preplan! Don’t wait until you’re in the wrong place at the wrong time---with no time.
- Trigger points should be based on measurable factors such as:
  - RH
  - Winds
  - Fire Behavior
  - Topographical boundaries
  - Time constraints/Time of day
  - Time/distance to safety zones
  - Loss of suppression resources
  - Other operational considerations (e.g., firefighter fatigue, loss of lookouts or communication, weather change)
- As you approach predetermined trigger points, go through the Risk Management Process to help you decide if a change in tactics is required. (See the Incident Response Pocket Guide)
  - Gather information to assure good Situational Awareness
  - Assess hazards to anticipate serious risks
  - Establish hazard controls to mitigate serious risks
  - Make decisions based on your ability to mitigate those serious risks
  - Evaluate effectiveness of current actions
- Command/Leadership responsibilities when changing tactics
  - Communicate the changes to your subordinates, as well as to adjacent forces and up the chain of command
  - Account for all your people
  - Make sure everyone knows and follows the new plan

**Have an idea? Have feedback? Share it.**
