Predictive Services Discussion: A strong ridge will remain over the West with a weak upper wave moving across the coast under the ridge. A trough will slowly move across the East. Scattered showers and thunderstorms will continue across most of the East and the Gulf region. Parts of the deep South will remain under a flood threat. Scattered afternoon thunderstorms will form over the Rockies. Isolated thunderstorms will form over the Sierras and parts of the Northwest as the upper wave moves inland. Mild conditions will continue over most of the central and eastern U.S. while the West remains in very warm to hot weather. In Alaska, a deepening low in the north will bring scattered showers and a few thunderstorms to most of the state. Temperatures will remain mild to warm.

SPOT WEATHER FORECAST

Weather / Fire Behavior Category

Spot weather forecasts should be requested or submitted online for those fires that have potential for extreme fire behavior, exceed initial attack, or are located in areas where Red Flag Warnings have been issued.

- Basic elements needed for a spot weather forecast include:
 - Name of fire and management agency
 - Request time and date
 - Location by ¼ section
 - Drainage name
 - Exposure
 - Size
 - Elevation (top and bottom)
 - Fuel type
 - Fire character (ground, crown, etc.)
 - Weather conditions (place, elevation, observation time, wind direction, wind velocity, dry bulb, wet bulb, remarks and important U.S. indicators)

Activity: Calibrate your Kestrel and review belt weather kit use.
