

**National Interagency Coordination Center  
Incident Management Situation Report  
Tuesday, June 7, 2016 – 0530 MT  
National Preparedness Level 2**

**National Fire Activity**

Initial attack activity:	Light (101 new fires)
New large incidents:	4
Large fires contained:	1
Uncontained large fires:**	10
Area Command Teams Committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	1
Type 2 IMTs committed:	1

\*\*Uncontained large fires include only fires being managed under a full suppression strategy.  
[Link](#) to Geographic Area daily reports.

Ten wildland fire suppression crews are assigned to support large fires in Alberta, Canada.

**Southern California Area (PL 2)**

New fires:	18
New large incidents:	0
Uncontained large fires:	4
Type 1 IMTs committed:	1

**Coleman**, Los Padres NF. IMT 1 (McGowan). Eleven miles southwest of King City, CA. Chaparral and tall grass. Moderate fire behavior. Numerous residences threatened. Road, area and trail closures in effect. Reduction in acreage due to more accurate mapping.

**Old**, Los Angeles County Fire Department. One mile east of Calabasas, CA. Brush and short grass. Moderate fire behavior backing, smoldering and creeping.

**Chimney**, Central California District, BLM. Ten miles west of Pearsonville, CA. Hardwood slash, brush and grass. Minimal fire behavior. Road closures in effect. Last report unless significant activity occurs.

**Soda**, Central California District, BLM. Eight miles north of Cuyama, CA. Brush and tall grass. No new information. Last report unless new information is received.

Incident Name	Unit	Size		%	Ctn/ Comp	Est	Personnel		Resources			Strc Lost	\$\$ CTD	Origin Own

### **Southwest Area (PL 3)**

New fires: 11  
New large incidents: 1  
Uncontained large fires: 2  
Type 2 IMTs committed: 1

**Juniper**, Tonto NF. IMT 2 (Bales). Ten miles south of Young, AZ. Timber and chaparral. Active fire behavior with flanking, backing and isolated torching. Area closures in effect. Residence threatened.

\* **Longview**, Arizona State Forestry, DOF. Four miles southwest of Elgin, AZ. Tall grass. Active fire behavior with running, flanking and creeping. Structures threatened.

**Mule Ridge**, Coronado NF. Two miles south of Ruby, AZ. Brush and short grass. Minimal fire behavior. Last report unless significant activity occurs.

Incident Name	Unit	Size		%	Ctn/ Comp	Est	Personnel		Resources			Strc Lost	\$\$ CTD	Origin Own

### **Northwest Area (PL 2)**

New fires: 6  
New large incidents: 2  
Uncontained large fires: 2

\* **Owyhee Canyon**, Vale District BLM. Four miles south of Rome, OR. Brush and short grass. Active fire behavior with running and wind driven runs. Sage grouse habitat threatened.

\* **Draw**, Fremont-Winema NF. Twenty miles northeast of Chiloquin, OR. Timber and brush. Active fire behavior with group torching and spotting.

**Predictive Services Discussion:** A slow pattern keeps a trough in the East and a ridge in the West. An upper low forms under the ridge in the West over the Great Basin. Scattered showers and thunderstorms continue over the Great Lakes and New England. Storms decrease in the South, remaining active in the far Southeast and along the immediate Gulf Coast. Widely scattered afternoon thunderstorms will form over central Rockies and across parts of the Great Basin and Northwest. Temperatures remain mild across the northern Plains to New England with some warming in the South. Temperatures cool slightly in the West but overall conditions remain very warm to hot. In Alaska, an upper low will keep scattered showers and a few thunderstorms over the state. Temperatures will remain mild to warm statewide.

## NFDRS PocketCards

*Weather/Fire Behavior Category*

The NFDRS PocketCard is a tool for field personnel to locally track outputs of the National Fire Danger Rating System (NFDRS) throughout the fire season. It is based on current and historical weather for a localized area and the area's historic fire occurrence. The PocketCard displays a general assessment of the fire potential and identifies combinations of local weather and fuel conditions that might contribute to severe fire behavior.

### **The PocketCard provides:**

- A general indicator of the potential fire danger for a given rating or protection area.
- A graph showing the trend and status of the current year's fire season.
- A comparison of current year conditions to historical worst and average conditions.
- Fire danger values related to past large or problem fires.
- Critical local thresholds for temperature, humidity, wind speed, and fuel moistures associated with large or problem fires.
- 

### **Discuss the following ways to use the PocketCard:**

- Use it primarily before fires occur, before arriving to a fire. It is also useful during initial fire size-up, initial attack, and extended attack.
- Use it to learn of critical thresholds that predict the potential for extreme fire behavior for the local area. Be aware that local critical thresholds may be occurring earlier in the season.
- Use it to compare current and predicted local fire danger to historical local fire danger to enhance situational awareness.
- Use it to track daily fire danger indices that gauge the potential for weather and fuels to support extreme fire behavior and of the difficulty of control.
- Use it to supplement local experience.
- Use it as a point of reference for firefighters not familiar with the area represented by the card.
- When you receive a fire assignment outside your local area, visit the National PocketCard website at <http://fam.nwcg.gov/fam-web/pocketcards/default.htm> where PocketCards are filed by Geographic Area.
- Put it in the pocket of all your firefighters and keep one in your fire vehicle.
- Post it in dispatch. Use them in briefings. Provide them to incoming crews.
- **Do not use the PocketCard for site specific fire behavior predictions and fireline actions or without an interpretive briefing.**
- Review definitions and implications of ERC and BI values.
