

**National Interagency Coordination Center  
Incident Management Situation Report  
Monday, June 13, 2016 – 0530 MT  
National Preparedness Level 2**

**National Fire Activity**

Initial attack activity:	Light (95 new fires)
New large incidents:	1
Large fires contained:	0
Uncontained large fires:**	10
Area Command Teams Committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	1
Type 2 IMTs committed:	3

\*\*Uncontained large fires include only fires being managed under a full suppression strategy.  
[Link](#) to Geographic Area daily reports.

**Southwest Area (PL 3)**

New fires:	8
New large incidents:	0
Uncontained large fires:	2
Type 2 IMTs committed:	2

**Tenderfoot**, Phoenix District, BLM. IMT 2 (Sinclair). One mile south of Yarnell, AZ. Brush and tall grass. Minimal fire behavior. Evacuations, road and area closures have been lifted.

**Juniper**, Tonto NF. Transfer of command from IMT 2 (Bales) back to the local unit will occur today. Ten miles south of Young, AZ. Timber and chaparral. Minimal fire behavior with backing and smoldering. Numerous structures threatened. Area closures in effect. Last report unless significant activity occurs.

**Escondida**, Socorro District, New Mexico State Forestry. Four miles north of Socorro, NM. Chaparral, brush and tall grass. Minimal fire behavior with backing and creeping. Road closures in effect.

Incident Name	Unit	Size		%	Ctn/ Comp	Est	Personnel		Resources			Strc Lost	\$\$ CTD	Origin Own

**Predictive Services Discussion:** A strong low over the Gulf of Alaska will move toward the Pacific Northwest. A weak trough will linger over the Southwest while the eastern U.S. ridge weakens. Showers will increase along the northwestern coast while scattered showers and thunderstorms develop over the central and northern Rockies and move into the Plains. Showers and thunderstorms will spread northward across the Mississippi Valley to the Great Lakes. Temperatures will continue to warm slowly in the West while the heat in central and southern states continues. Mild conditions will remain in the Great Lakes and New England. In Alaska, a front will move into the north and bring showers and cooler conditions. Scattered showers and a few thunderstorms will continue across the central and southern parts of the state. Temperatures will remain warm across the central and eastern Interior and mild in the south.

## CONSTRUCTING LINE WITHOUT A SAFE ANCHOR POINT

*Operational Engagement*

When deciding where to build fireline, the following considerations must be weighed:

- Can you hold the line without the fire hooking under/around you? How do you protect against losing the line and ensure your safety if there is a danger of the fire hooking around you?
- Are there adequate safety zones and escape routes? Review what constitutes an adequate safety zone and escape route. Who has the responsibility to designate them and continue to make sure they are adequate?
- Can you develop your starting point into an anchor point? List some good anchor points. Describe how you would develop your starting point into an anchor point.
- Have you posted good lookouts? Where should the lookout(s) be posted? Who can be a lookout?
- Do you have good communications? Who do you need to be in contact with? If the communications are not good, what can you do to improve them?
- To reduce the risks, start the line in another location. Talk about fires where you have had to relocate the line because your anchor point did not hold the fire.
- Do you have a lookout posted? Can they see the main fire?
- How have you mitigated Watchout Situation #8?
