

**National Interagency Coordination Center  
Incident Management Situation Report  
Sunday, July 3, 2016 – 0530 MT  
National Preparedness Level 2**

**National Fire Activity**

Initial attack activity:	Light (110) new fires
New large incidents:	2
Large fires contained:	3
Uncontained large fires:**	14
Area Command Teams Committed:	0
NIMOs committed:	1
Type 1 IMTs committed:	4
Type 2 IMTs committed:	5

\*\*Uncontained large fires include only fires being managed under a full suppression strategy.  
[Link](#) to Geographic Area daily reports.

**Southern California Area (PL 4)**

New fires:	23
New large incidents:	0
Uncontained large fires:	5
Type 1 IMTs committed:	3
Type 2 IMTs committed:	1

**Pine**, Los Padres NF. IMT 2 (Mills). Thirty miles northeast of Santa Barbara, CA. Timber, chaparral, and brush. Active fire behavior with short-range spotting, uphill runs, and backing. Structures threatened. Road, area, and trail closures in effect.

**Deer**, Kern County Fire Department. Cal Fire IMT 1 (Gouvea). Seven miles west of Ricardo, CA. Timber, brush, and tall grass. Active fire behavior with flanking and smoldering. Numerous residences threatened. Evacuations and road closures in effect.

**Curry**, Fresno-Kings Unit, Cal Fire. Cal Fire IMT 1 (Patterson). Six miles southwest of Coalinga, CA. Chaparral and tall grass. Minimal fire behavior. Area restrictions and road closures in effect.

**Erskine**, Central California District, BLM. Transfer of command from IMT 1 (Minton) back to the local unit will occur today. One mile southeast of Lake Isabella, CA. Timber, brush, and short grass. Minimal fire behavior. Area and trail closures in effect.

**Marina**, Inyo NF. One mile northwest of Lee Vining, CA. Timber and brush. Minimal fire behavior. Evacuations in effect. Precipitation occurred over the fire area yesterday.

**Predictive Services Discussion:** Isolated thunderstorms will linger over the Great Basin and the northern and central Rockies. Strong thunderstorms will form along a front in the central Plains and move toward the southern Appalachians. Scattered diurnal thunderstorms will form along the Gulf and Southeast coasts. A front moving across the Northwest will continue to lower temperatures but readings will remain high in the Southwest. The southern states will continue to swelter in heat and humidity while the Plains to the Northeast remain mild. In Alaska, scattered showers and thunderstorms spread northward through the Interior. Temperatures begin to cool slightly as the upper ridge weakens but conditions remain quite warm in the Interior.

## Day 4

# Situational Awareness and Mindfulness

Week of Remembrance June 30-July 6

Applying Situational Awareness (SA) – an on-going process of *perceiving* what is going on around you, *comprehending* the meaning of what we are noticing, and *projecting and predicting* this comprehension forward in time – can often be challenging. Research has indicated that three-fourths of SA errors can be traced to something important happening in our environment, and we missed it (Jones & Endsley, 1996). In a high risk world like wildland fire, missing important cues or events can lead to catastrophic outcomes. The practice of mindfulness can help.

### What is mindfulness?

Mindfulness is paying attention, on purpose, and in the present moment (Kabat-Zinn, 1990). In wildland fire, research has shown that when we are operating at our best we are often engaging mindfully (Lewis & Ebbeck, 2014). Through practicing we can become more mindful or “mentally fit” to catch more errors more of the time.

### How to Practice:

Mindfulness is training your awareness to be where it is most useful in the moment. To practice your attention needs to be focused in the present moment, and hold a non-judgmental attitude of what you perceive. Here are a few exercises to try for one minute each:

- **Breathing:** Focus on the breath coming in your nose, into your lungs, and pushing back out, watching the breath move; if your mind wanders gently refocus it back on the breath.
- **Walking:** Walk around very slowly and pay attention to the feeling of the foot making contact with the ground with each step; if your mind wanders gently bring it back and refocus.

### Day-to-Day:

- When driving, avoid multi-tasking. If you need to make a phone call, talk on the radio, eat, or look for something inside the vehicle, pull over if possible and complete that task.
- Mindset: when doing something you’ve done a lot, or that is “routine”, see if you can notice 2-3 new things about what you are doing rather than doing them on autopilot.
- When engaged in these routine behaviors (brushing your teeth, sitting in traffic, eating) practice being in the moment as much as possible. The more often you practice it in these situations, the more able you will be to utilize this skill in the dynamic environments in which we work.

Situation Awareness: (WFSTAR video)

Sleep Deprivation: (TedEd)

The topics for the NWCG “Wildland Firefighter Week of Remembrance” have been drawn from the Human Performance Optimization course taught as a part of the USFS Apprentice Academy in cooperation with the Missoula Technology and Development Center (MTDC) and is rooted in the desire to prepare wildland fire personnel to optimally manage themselves and others at any given time. Review and resources have been contributed by the Wildland Fire Lessons Learned Center, NIFC External Affairs, the Wildland Fire annual refresher group, and the Wildland Fire Leadership Subcommittee.
