

**National Interagency Coordination Center
Incident Management Situation Report
Wednesday, July 6, 2016 – 0530 MT
National Preparedness Level 2**

National Fire Activity

Initial attack activity:	Heavy (321) new fires
New large incidents:	7
Large fires contained:	1
Uncontained large fires:**	15
Area Command Teams Committed:	0
NIMOs committed:	1
Type 1 IMTs committed:	2
Type 2 IMTs committed:	6

**Uncontained large fires include only fires being managed under a full suppression strategy.

Predictive Services Discussion: Westerly flow aloft will remain over the northern U.S. An upper trough will drop into the northern Rockies, bringing scattered showers and thunderstorms to the northern Rockies and the northern Plains. Elsewhere in the West, dry and occasionally windy conditions will continue. Scattered showers and thunderstorms will continue over most of the eastern U.S. from the Mississippi Valley to the Atlantic Coast. Temperatures will remain hot across the southern half of the country while the north remains mild to warm. In Alaska, scattered showers and a few thunderstorms will develop over much of the state. Temperatures will remain warm in the Interior and mild to the north and south.

Day 7

How do all pieces fit together for optimal performance?

Week of Remembrance June 30-July 6

The past 6 days have been spent exploring core aspects of optimal human performance. As fire professionals we are often asked to perform optimally in a changing, dynamic environment. Like a buffet is full of different food options to fill your plate – you may like some things and dislike others, but creating a balanced plate with foods from all major food groups will lead to the best option for fueling the body. The same is true for human performance. By building and preparing yourself physically and psychologically each day to face the demands of the environment, or that “mountain to climb” you will be more able to operate soundly, effectively, and safely.

From research we have learned that taking the time to identify and write down intended goals and actions can lead to a 40% more chance of doing what was written (Matthews, 2015); thinking about the past six days what are three things you can do physically and psychologically to better prepare yourself for the demands you face on the job?

What are three ways you can optimize your *body* for the demands placed on it?

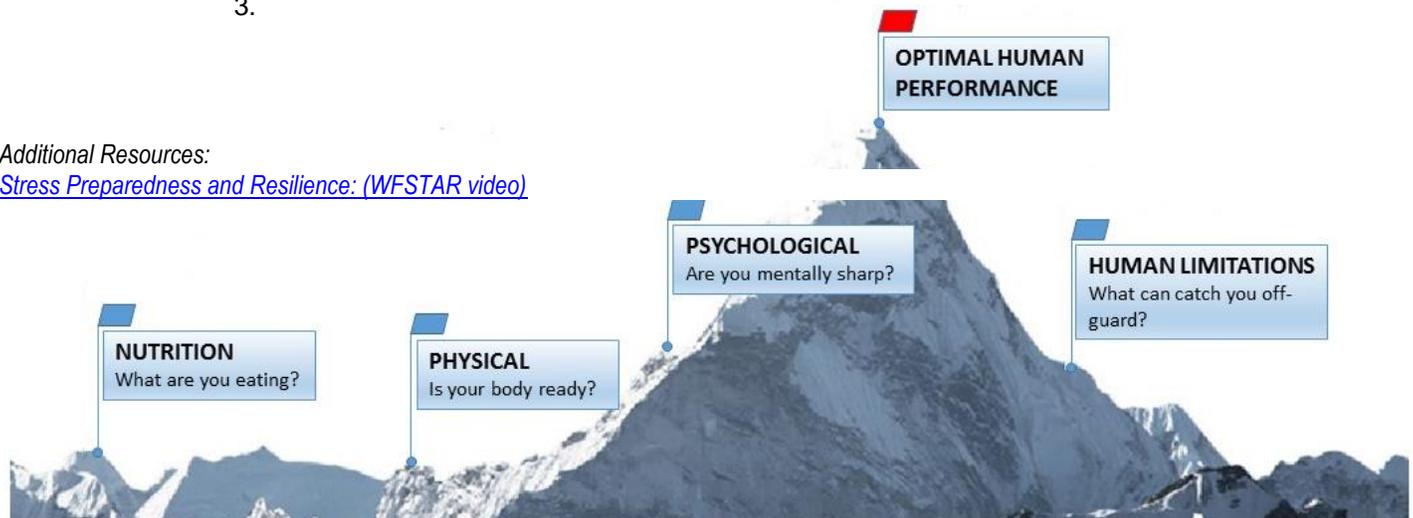

- 1.
- 2.
- 3.

What are three ways you can optimize your *mind* for the demands placed on it?

- 1.
- 2.
- 3.

Additional Resources:

[Stress Preparedness and Resilience: \(WFSTAR video\)](#)

The topics for the NWCG “Wildland Firefighter Week of Remembrance” have been drawn from the Human Performance Optimization course taught as a part of the USFS Apprentice Academy in cooperation with the Missoula Technology and Development Center (MTDC) and is rooted in the desire to prepare wildland fire personnel to optimally manage themselves and others at any given time. Review and resources have been contributed by the Wildland Fire Lessons Learned Center, NIFC External Affairs, the Wildland Fire annual refresher group, and the Wildland Fire Leadership Subcommittee.

This Week of Remembrance is dedicated to all those who have fallen in the line of duty and has been intended to serve as an opportunity to renew our commitment to the health, wellness and safety of wildland firefighters.
