

**National Interagency Coordination Center
Incident Management Situation Report
Thursday, September 29, 2016 – 0530 MT
National Preparedness Level 2**

National Fire Activity

Initial attack activity:	Light (81 new fires)
New large incidents:	1
Large fires contained:	0
Uncontained large fires:**	11
Area Command Teams Committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	2
Type 2 IMTs committed:	3

**Uncontained large fires include only fires being managed under a full suppression strategy.

Northern California (PL 3)

New fires:	13
New large incidents:	0
Uncontained large fires:	4
Type 1 IMTs committed:	1
Type 2 IMTs committed:	1

Loma, Santa Clara Unit, Cal Fire. Cal Fire IMT 1 (Patterson). Fifteen miles south of San Jose, CA. Timber and chaparral. Active fire behavior with torching and short-range spotting. Numerous residences threatened. Evacuations, road and area closures in effect.

Tobin, Plumas NF. IMT 2 (Young). Twenty miles northeast of Paradise, CA. Timber, medium logging slash and chaparral. Moderate fire behavior with single tree torching, flanking and backing. Residences threatened. Reduction in acreage due to more accurate mapping.

Sawmill, Sonoma-Lake Napa Unit, Cal Fire. Nine miles northeast of Geyserville, CA. Brush and tall grass. Minimal fire behavior.

Soup Complex, Modoc NF. Sixteen miles northeast of Likely, CA. Timber, brush and tall grass. Minimal fire behavior. Road, area and trail closures in effect.

*** Changes in some agency YTD acres reflect more accurate mapping or reporting adjustments. ***

Additional wildfire information is available through the Geographic Areas at <http://gacc.nifc.gov/>

Predictive Services Discussion: Scattered showers and few thunderstorms will develop over the Mid-Atlantic and the Northeast as an upper low drifts moves over the region. A deepening trough in the West will keep scattered showers and thunderstorms over the Southwest and the Great Basin. Cool to mild weather will again spread over most of the country as a cold front pushes in the South. Warm conditions will linger over the Gulf Coast and across the Desert Southwest and the interior California valleys.

SAFENET

Fire Communication Category

SAFENET is a form and process for front line firefighters that provides a way to be heard and get unsafe situations resolved. SAFENET has been in demand by firefighters themselves. It is a method for prompt reporting and timely resolution of safety and health concerns encountered in wildland fire, all hazard operations, or other related work environments. The information on the form assists in the collection of important, safety-related data at the National Interagency Fire Center, to determine long-term trends and problem areas. Here are some facts about SAFENET and how it works.

- Individuals who observe or who are involved in an unsafe situation shall initiate corrective actions if possible, and then report the occurrence using SAFENET. SAFENET reports should identify unsafe situations in wildland fire, all hazard operations, or other related work environments.
- SAFENETs should be submitted to the first line supervisor, whose responsibility it is to resolve the situation as quickly as possible.
- SAFENETs may also be submitted directly to the SAFENET system via:
 - The internet at safenet.nifc.gov or linking to it through the NIFC website.
 - Telephone at (1-888-670-3938)
 - Direct Mail to SAFENET, P.O. Box 16645, Boise, Idaho, 83715-9750
- SAFENET was originally intended for wildland fire operations, but can be used to report on activities such as training, and all hazard events.
- Submitters are encouraged, but not required, to put your name on the report. You don't have to identify yourself to fill out a SAFENET, you can do it anonymously. All SAFENETs will be sanitized before posting to the web. See [SAFENET Protocols](#) for sanitizing process.
- There is no punishment or penalty for filing a SAFENET, nor is it mandatory.
- SAFENETs related to incidents that have on-going serious accident investigations will not be posted until formal investigation process is completed. These SAFENETs will be sent directly to the serious accident investigation team.
- SAFENETs that do not meet posting criteria (see [SAFENET Protocols](#)) will not be posted to the website.

SAFENET is not the only way to correct a safety-related concern; it does not replace accident reporting or any other official agency reporting method. It's simply an easy, quick way to report a safety concern. It's also a way for front line firefighters to be involved in the daily job of being safe and keeping others safe, by documenting and helping to resolve safety issues.

The NWCG encourages comments and suggestions for improvement of the SAFENET program. Please share your ideas by emailing the SAFENET_Administrator@blm.gov.
