Rocky Mountain Area (PL 4)

New fires: 21
New large incidents: 1
Uncontained large fires: 8
NIMOs committed: 1
Type 1 Teams committed: 1
Type 2 Teams committed: 3

Spring Creek, Costilla County. IMT 2 (Greer) and IMT 2 (Esperance). Nine miles northeast of Fort Garland, CO. Timber, brush and tall grass. Moderate fire behavior with short crown runs, group torching and long-range spotting. Several communities threatened. Evacuations, road, area and trail closures in effect.

* Lake Christine, Eagle County. IMT 2 (Almas). One mile northwest of Basalt, CO. Timber and brush. Extreme fire behavior with running and long-range spotting. Numerous structures, energy and communication infrastructure threatened. Road, area and trail closures in effect.

Weston Pass, Pike-San Isabel NF. IMT 1 (Pechota). IMT is also managing the Chateau fire. Nine miles southwest of Fairplay, CO. Timber and brush. Active fire behavior with crowning and flanking. Numerous residences threatened. Evacuations, road, area and trail closures in effect.

Chateau, Teller County. Seven miles northwest of Cripple Creek, CO. Closed timber litter and tall grass. Minimal fire behavior with torching, backing and creeping. Numerous residences threatened. Evacuations have been lifted. Road, area and trail closures in effect.

Badger Creek, Medicine Bow-Routt NF. Two miles northwest of Mountain Home, WY. Timber. Active fire behavior with group torching, backing and smoldering. Numerous structures threatened. Area and trail closures in effect.

416, San Juan NF. NIMO (Reinarz). Thirteen miles north of Durango, CO. Timber and brush. Moderate fire behavior with torching and short-range spotting. Road, area and trail closures in effect.

Burro, San Juan NF. Fourteen miles south of Rico, CO. Timber. Moderate fire behavior with torching and creeping. Road, area and trail closures in effect.

Large Fires Being Managed With A Strategy Other Than Full Suppression Without a Type 1 or 2 IMT Assigned
### Great Basin Area (PL 3)

- New fires: 22
- New large incidents: 2
- Uncontained large fires: 9
- Type 1 IMTs committed: 1
- Type 2 teams committed: 2

**Dollar Ridge**, Northeast Area, Utah DOF. Transfer of command from IMT 2 (Rohrer) to IMT 1 (DeMasters) will occur today. Thirty-six miles southeast of Heber, UT. Timber, tall grass and brush. Extreme fire behavior with crowning, running and long-range spotting. Numerous residences threatened. Evacuations, road, area and trail closures in effect.

**Hogan**, Elko District Office, BLM. Twenty-five miles southeast of Wells, NV. Timber, brush and short grass. Active fire behavior with running and group torching. Structures and major railroad threatened.

* **Five Cent**, Boise District, BLM. Twelve miles southwest of Mountain Home, ID. Short grass. Active fire behavior with running and backing.

**Trail Mountain**, Manti-La Sal NF. Fifteen miles northwest of Orangeville, UT. Timber and brush. Moderate fire behavior with isolated torching, backing and creeping. Road, area and trail closures in effect.

**HD**, Elko County. Fourteen miles north of Wells, NV. Brush and short grass. Minimal fire behavior.

Northern California Area (PL 3)

New fires: 29
New large incidents: 0
Uncontained large fires: 4
Type 1 IMTs committed: 1

County, Sonoma-Lake Napa Unit, Cal Fire. Cal Fire IMT 1 (See). IMT is also managing the Pawnee fire. One mile southwest of Guinda, CA. Brush. Active fire behavior with uphill runs, backing and short-range spotting. Numerous structures threatened. Evacuations, road, area and trail closures in effect.

Flat, Shasta-Trinity Unit, Cal Fire. Five miles south of Douglas City, CA. Timber, brush and grass. Minimal fire behavior.

Creek, Shasta-Trinity Unit, Cal Fire. Four miles north of Happy Valley, CA. Brush and tall grass. Minimal fire behavior. Numerous structures threatened.
Northwest Area (PL 2)

New fires: 14
New large incidents: 0
Uncontained large fires: 4
Type 1 IMTs committed: 1

Lobster Creek, Gold Beach Unit, Oregon DOF. ODF IMT 1 (Smith). Ten miles east of Gold Beach, OR. Timber and heavy logging slash. Moderate fire behavior with creeping and smoldering. Road closures in effect. Reduction in acreage due to more accurate mapping.

Mecca, Warm Springs Agency, BIA. Two miles east of Warm Springs, OR. Brush and short grass. No new information.

Boxcar, Prineville District, BLM. Includes previously reported South Junction fire. Started on private land one mile southeast of Maupin, OR. Timber, brush and short grass. No new information.

Jack Knife, Prineville District, BLM. Started on private land 11 miles southeast of Grass Valley, OR. Timber, brush and tall grass. No new information.

**Predictive Services Discussion:** The massive ride of high pressure will begin to move into the West late in the morning and into the Four Corners region by afternoon. The width of this ridge will extend from just off the coast of California east to Bermuda in the Atlantic Ocean. That’s about 5000 miles wide! Expect very hot and dry conditions under this ridge across the West and very hot and humid conditions across the East. The ridge will allow for the monsoon to strengthen over the Southwest and for moisture to begin feeding north into Wyoming and possibly Montana. The only part of the Lower 48 not impacted by the ridge will be the Pacific Northwest and most of Northern California, which will continue to be shielded from it by a trough located just off shore in the Pacific Ocean.

In Alaska, high pressure over Kotzebue and low pressure over the northern Gulf will continue to allow for cooler than average conditions across the eastern Interior. However, the high pressure ridge along the West Coast will move inland to Galena and will allow for a return to above average temperatures across the western Interior.

Day 6
Leadership in Medevac Situations

Week of Remembrance June 30-July 6
This Week of Remembrance is dedicated to all those who have fallen in the line of duty and is intended to serve as an opportunity to renew our commitment to the health, wellness and safety of wildland firefighters.

It’s July 5th and you just attended morning briefing and received your crew’s assignment for the day. In your division breakout they mentioned that you would be operating in some “pretty gnarly terrain” filled with loose rocks and steep slopes. You brief the crew on the day’s mission, get them going and then start to scout out what’s ahead. All of a sudden you get a call from one of sawyers saying their saw partner has been hit by a rolling rock and is unconscious. WHAT DO YOU DO???

“Fire is a complex, dynamic, and often unpredictable phenomenon. Fire operations require mobilizing a complex organization that includes management, command, support, and firefighting personnel, as well as aircraft, vehicles, machinery, and communications equipment. While the magnitude and complexity of the fire itself and of the human response to it will vary, the fact that fire operations are inherently dangerous will never change. A firefighter utilizing the best available science, equipment, training, and working within the scope of agency doctrine and policy, can still suffer serious injury or death.” Federal Interagency Standards for Fire and Fire Aviation Operations, or ‘Red Book’ - Chapter 1, pg. 8

The guiding doctrine for fire operations clearly states that the environment that we work in is filled with many unknown variables. As leaders it’s our responsibility to adequately prepare ourselves and team members for the inevitable situations we will be faced with. Medevac situations add another level of complexity within our environment and usually tend to be chaotic in nature. Emotions run high, fog of war rolls in and often times it’s a situation a lot of people haven’t been involved with. During these situations it is imperative to be cognizant of your operational tempo and ensure you give clear leaders intent.

**Operational tempo**: is the speed and intensity of our actions relative to the speed and intensity of unfolding events in the operational environment. When life is threatened there is an obvious sense of urgency. Remember the 6th Standard Firefighting Order: Be alert. Keep calm. Think clearly. Act decisively.

**Clear leader’s intent**: is the foundation to bringing order to chaos. It allows you to effectively give a clear task, purpose and end state. When the situation presents itself you may find yourself as the Incident within an Incident commander whether or not you’re the Division, Crew Boss, or Squad Leader. You must rapidly evaluate the situation and build an organization to assist in patient care, transportation and communication.

**Action**: Watch this video ([WFSTAR preparing for wildfire medevac](#)) then answer the following questions

1. What are you doing preseason to train for medevac situations? Do you incorporate medevac scenarios into your sandtable exercises?
2. Does everyone understand the Medical Incident Report and the process involved? Is everyone prepared to act as the Incident Commander for a medical situation? What are some considerations when establishing a command structure to handle the situation?
3. What are some considerations to consider post medevac? How is the crew handling the situation? Is there a need for peer support or CISM?

“We honor and remember through learning”
Brit Rosso
Director, LLC

The topics, review, and resources for the NWCG “Wildland Firefighter Week of Remembrance” have been contributed by the Wildland Fire Lessons Learned Center, the Wildland Fire Leadership Subcommittee, the Interagency Helicopter Operations Subcommittee, interagency dispatchers, and many other field SMEs.
