National Interagency Coordination Center
Incident Management Situation Report
Sunday, September 9, 2018 – 0530 MT
National Preparedness Level 3

National Fire Activity
Initial Attack Activity: Light (75 fires)
New large incidents: 8
Large fires contained: 0
Uncontained large fires:** 37
Area Command teams committed: 0
NIMOs committed: 1
Type 1 IMTs committed: 6
Type 2 IMTs committed: 13
Nationally, there are 57 large fires being managed under a strategy other than full suppression.
**Uncontained large fires include only fires being managed under a full suppression strategy.
[Link](#) to Geographic Area daily reports.

One RC-26 aircraft with Distributed Real-Time Infrared (DRTI) capability and support personnel from the 141st Air Refueling Wing (Washington Air National Guard) has been deployed to Spokane, WA in support of wildland fire operations in the West.

Northwest Area (PL 3)

New fires: 20
New large incidents: 5
Uncontained large fires: 11
Type 1 IMTs committed: 3
Type 2 IMTs committed: 4

Crescent Mountain, Okanogan-Wenatchee NF. IMT 1 (Turman). IMT 1 (Schulte) mobilizing. IMT is also managing the McLeod and Holman incidents. Eighteen miles west of Winthrop, WA. Timber. Moderate fire behavior with backing, creeping and flanking. Numerous residences threatened. Evacuations, road, area and trail closures in effect.

McLeod, Okanogan-Wenatchee NF. Six miles north of Mazama, WA. Timber. Moderate fire behavior with isolated torching, backing and flanking. Road, area and trail closures in effect.
Holman, Okanogan-Wenatchee NF. Nineteen miles northwest of Mazama, WA. Timber. Minimal fire behavior. Structures and communication infrastructure threatened. Road, area and trail closures in effect.

Klondike, Rogue River-Siskiyou NF. IMT 1 (Dueitt). Nine miles northwest of Selma, OR. Timber and brush. Moderate fire behavior with backing, isolated torching and flanking. Residences threatened. Road, area and trail closures in effect.

Terwilliger, Williamette NF. IMT 2 (Connell) IMT 2 (Johnson) mobilizing. Five miles southeast of Blue River, OR. Timber, hardwood litter, and closed timber litter. Active fire behavior with flanking, torching and short-range spotting. Numerous structures threatened. Road, area and trail closures in effect.

Natchez, Rogue River-Siskiyou NF. IMT 2 (Knerr). Fifteen miles southeast of Cave Junction, OR. Timber, brush and hardwood litter. Active fire behavior with uphill runs, spotting and backing. Numerous structures threatened. Road, area and trail closures in effect.

Cougar Creek, Okanogan-Wenatchee NF. Transfer of command from IMT 2 (Lawson) back to the local unit will occur on 9/11. IMT is also managing the Bannock Lakes incident. Twelve miles northwest of Ardenvoir, WA. Timber, brush and short grass. Active fire behavior with torching, short crown runs and flanking. Road, area and trail closures in effect.

* Wahluke Slope, Mid-Columbia Wildlife Refuge, FWS. Fifteen miles southwest of Othello, WA. Brush and short grass. Active fire behavior with running and backing. Railroad infrastructure threatened.

* Tepee 1144 NE, Deschutes NF. Fifteen miles southeast of Bend, OR. Timber, brush and short grass. Active fire behavior with isolated torching, spotting and flanking. Structures threatened. Road, area and trail closures in effect.

* Willow 1145 RN, Prineville District, BLM. Three miles east of Madras, OR. Chaparral, brush, and tall grass. Moderate fire behavior with single tree torching, backing and creeping. Structures threatened. Road and area closures in effect.

* Glade Creek, Washington State. Seven miles southeast of Mabton, WA. Brush and tall grass. Active fire behavior with wind-driven runs and uphill runs. Residences threatened.

Miles, Umpqua NF. Five miles northeast of Trail, OR. Timber. Active fire behavior with group torching, creeping and spotting. Road, area and trail closures in effect.

Watson Creek, Fremont-Winema NF. Thirteen miles west of Paisley, OR. Timber, brush and heavy logging slash. Minimal fire behavior. Numerous structures threatened. Road, area and trail closures in effect.

Taylor Creek, Medford District, BLM. Ten miles west of Grants Pass, OR. Timber and brush. No new information. Last report unless new information is received.

*1 Hectare = 2.47 Acres

**Predictive Services Discussion:** As the upper level trough over southwestern Canada moves east toward Saskatchewan and Manitoba, the hot ridge of high pressure over the Southwest will slightly amplify northward. This will push temperatures 10 degrees or so above average. Breezy winds across the northern tier of the country could allow for pockets of critical fire weather conditions to develop in critically dry areas like the northern Great Basin and Oregon. To the east, Texas will begin to dry out, as a departing cold front to the northeast pulls the moisture into the Tennessee River Valley. The Mid-Atlantic States and New England will be wet with moderate rainfall, as the leading edge of the front moves east from the Great Lakes Region.

[http://www.predictiveservices.nifc.gov/outlooks/outlooks.htm](http://www.predictiveservices.nifc.gov/outlooks/outlooks.htm)
Attempting a frontal assault on a fire is recognized as Watchout Situation #10 and is a potentially dangerous tactic.

If your tactics include a frontal assault, the following checklist must be adequately addressed before engaging the fire:

- Has the fire been scouted and sized up? Who will scout and size up a fire and what are they looking for?
- Is your position defensible? List what makes a firefighter’s position defensible. (Anchor points, safety zones, escape routes, etc.)
- Do you have an anchor point? How would you establish an anchor point for a frontal assault on a fire?
- Do you have adequate resources to complete the assault? Discuss things you need to consider; for example, if the frontal assault fails, do you have backup?
- Are you informed on strategy, tactics, and hazards? Consider what could happen if someone has a different approach than you; i.e., the IC has a burnout operation planned while you are attempting frontal assault.
- Is the terrain favorable to holding the fire? Discuss ways the terrain will influence where you will make a stand.
- Are you relying on aircraft for support operation? Any operation, especially frontal assault, should not need air resources to be safe.

In order to reduce the risks, reassess your tactics, post lookouts, identify situations in which firefighters may be enticed to attempt frontal assault on a fire. Review why this may or may not be a good idea.
